To Whomsoever it may concerns **Date : 16-03-2022**

This is to certify that the following student of m/s Nagarjuna College of Engineering & Technology had underwent internship training in the assembly of 6TR hot water fired Vapor Absorption Machine supplied by

Blue Volt Services, 35,13th Main Road,
Vrishbhavathi Nagar, Kamakshipalya,
Bengaluru560079.

under the supervision of

Design & Manufacturing Consultant of Blue Volt Services :
R.Ilango, Quantum Solutions,Chennai-600050 and installed in the Mechanical Department Laboratory of

Nagrjuna College of Engineering & Technology,
Venkatakirikote Post, Bengaluru -562164.

Student Name	:	**SYED AFREED J**
Student ID	:	**INC18ME040**
Year of Study	:	**Final Year Mechanical**

Internship Training Period : Jan, 1 to March ,15, 2022.

The above student was trained in the following areas of the 6TR VAM:

1. Various components of VAM system.
2. Assembly and air pressure test of heat exchangers, Evaporator and Absorber.
3. Piping fabrication and assembly.
4. Control and power cable wiring of the control panel board .
5. Testing and preparation of the unit for commissioning.

We found his performance is good in the given assignment and I wish him success in his future career.

TRAINING · PLACEMENT · SOFTWARE · CONSULTANCY

CERTIFICATE OF INTERNSHIP

This is to certify that **Mr. Devendra K,** student of CADDESK Marathahalli, Bangalore having ID No. 8412/337 has successfully Completed Mechanical Design internship program from 15-April-2022 to 30-May-2022 in organization CADDESKINDIA. At Marathahalli.

Project Title: DESINING AND DROFTING OF 2 STROKE ENGINE

Project Explanation: A two-stroke (or two-cycle) engine is a type of internal combustion engine which completes a power cycle with two strokes (up and down movements) of the piston during only one crankshaft revolution. This is in contrast to a "four-stroke engine", which requires four strokes of the piston to complete a power cycle during two crankshaft revolutions. In a two-stroke engine, the end of the combustion stroke and the beginning of the compression stroke happen simultaneously, with the intake and exhaust (or scavenging) functions occurring at the same time. Two-stroke engines often have a high power-to-weight ratio, power being available in a narrow range of rotational speeds called the "power band". Compared to four-stroke engines, two-stroke engines have a greatly reduced number of moving parts, and so can be more compact and significantly lighter.

To Whomsoever it may concerns **Date : 16-03-2022**

This is to certify that the following student of m/s Nagarjuna College of Engineering & Technology had underwent internship training in the assembly of 6TR hot water fired Vapor Absorption Machine supplied by

Blue Volt Services, 35,13th Main Road, Vrishbhavathi Nagar, Kamakshipalya, Bengaluru-560079.

under the supervision of

Design & Manufacturing Consultant of Blue Volt Services : R.Ilango, Quantum Solutions,Chennai-600050 and installed in the Mechanical Department Laboratory of

Nagrjuna College of Engineering & Technology, Venkatakirikote Post, Bengaluru -562164.

Student Name : Harshavardhan. D
Student ID : INC18ME013
Year of Study : Final Year Mechanical
Internship Training Period : Jan, 1 to March ,15, 2022.

The above student was trained in the following areas of the 6TR VAM:

1.Various components of VAM system.
2.Assembly and air pressure test of heat exchangers, Evaporator and Absorber.
3.Piping fabrication and assembly.
4.Control and power cable wiring of the control panel board .
5.Testing and preparation of the unit for commissioning.

We found his performance is good in the given assignment and I wish him success in his future career.

R.Ilango, Certified Energy Auditor ,BEE
(Consultant for Blue Volt Services)
