

# Nagarjuna College of Engineering & Technology, Bengaluru

An Autonomous Institute, Affiliated to VTU Belagavi

Scheme & Syllabus of III Semester ISE

As per the NEP 2020 Guidelines, Choice-Based Credit System & Outcome-Based Education

# **Information Science & Engineering**

w.e.f.

Academic Year 2023-2024

# VISION

To disseminate the IT knowledge among the students for achieving excellence in education and to irradiate budding engineers as leaders in information technology.

# **MISSION**

M1: To maintain leadership and excellence in Information Technology.

M2: Achieving excellence in IT through analysis, design, development of software products

M3: Developing communication skills, leadership qualities and team work among students' community by providing opportunities to work on various projects through internship with industry partners

M4: To inculcate Ethics and Human values for solving societal problems and environmental protection.

M5: Promoting research, higher studies and entrepreneurship among the students through outside world interaction

# PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

The graduates of Information Science and Engineering are expected to fulfil the following PEOs after a few years of their graduation.

**PEO1:** Pursue a successful career in the field of Information Science & Engineering or a related field utilizing his/her education and contribute to the profession as an excellent employee, or as an entrepreneur.

**PEO2:** Be able to work effectively in multidisciplinary environments and be responsible members/leaders of their communities

**PEO3:** The graduates of Information Science and Engineering Program should be able to establish an understanding of professionalism, teamwork, ethics, public policy that allows them to become good professional Engineers

**PEO4:** The graduates of Information Science and Engineering Program should be able to provide novel engineering solutions and efficient software designs with legal and ethical responsibility.

**PEO5:** Continuously improve by pursuing advanced degrees in engineering, business, or other professional fields through formal means or through informal self-study.

# **PROGRAM OUTCOMES (POs)**

Graduates of the Information Science and Engineering Programmee will be able to achieve the following POs:

# **PO1: Engineering Knowledge**

Apply the knowledge of mathematics, science, engineering fundamentals, and Information Science and Engineering principles to the solution of complex problems in Information Science and Engineering.

# **PO2: Problem Analysis**

Identify, formulate, research literature, and analyze complex Information Science and Engineering problems reaching substantiated conclusions using first principles of mathematics and engineering sciences.

# **PO3: Design/Development of Solutions**

Design solutions for complex Information Science and Engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the publichealth and safety, and the cultural, societal, and environmental considerations.

# **PO4:** Conduct investigations of Complex problems

Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions related to Information Science and Engineering problems.

# **PO5: Modern Tool Usage**

Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex Information Science and Engineering activities with an understanding of the limitations.

# **PO6: The Engineer and Society**

Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional Information Science and Engineering practice.

# **PO7: Environment and Sustainability**

Understand the impact of the professional **Information Science and Engineering** solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

# **PO8: Ethics**

Apply ethical principles and commit to professional ethics and responsibilities and norms of the Information Science and Engineering practice.

# **PO9: Individual and Team work**

Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

# **PO10: Communication**

Communicate effectively on complex Information Science and Engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

# **PO11: Project Management and Finance**

Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage Information Science and Engineering projects and in multidisciplinary environments.

# **PO12: Life Long Learning**

Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

# PROGRAM SPECIFIC OUTCOMES (PSOs)

Program Specific Outcomes (PSOs) are what the graduates of a specific undergraduate engineering program should be able to do at the time of graduation.

# **PSO1: Professional Skills**

The ability to understand, analyze and develop algorithms and write Information application programs in the areas related to information technology

# **PSO2:** Problem-Solving Skills

Ability to understand the ethics, human values for solving societal problems and environmental protection

# **PSO3:** Foundation of mathematical concepts

Ability to understand the software development skills and practical knowledge for promoting research, higher studies and entrepreneurship.

# NAGARJUNA COLLEGE OF ENGINEERING & TECHNOLOGY, BENGALURU B.E. in Information Science & Engineering

Scheme of Teaching and Examination 2023-24

Outcome-Based Education (OBE) and Choice Based Credit System (CBCS)

(Effective from the academic year 2022-23)

<b>K</b> :	Common to all the stream of engineering	ESC:	Engineering Science Course
ETC:	Emerging Technology Course	PLC:	Programming Language Course

**Professional Core Course (IPCC):** Refers to Professional Core Course Theory Integrated with practicals of the same course. Credit for IPCC can be 04 and its Teaching– Learning hours (L : T : P : S) can be considered as (3 : 0 : 2 : 0) or (2 : 2 : 2 : 0). The theory part of the IPCC shall be evaluated both by CIE and SEE. The practical part shall be evaluated by only CIE (no SEE). However, questions from the practical part of IPCC shall be included in the SEE question paper. For more details, the regulation governing the Degree of Bachelor of Engineering /Technology (B.E./B.Tech.) 2022-23 may please be referred.

**National Service Scheme /Physical Education/Yoga:** All students have to register for any one of the courses namely National Service Scheme (NSS), Physical Education (PE)(Sports and Athletics), and Yoga(YOG) with the concerned coordinator of the course during the first week of III semesters. Activities shall be carried out between III semester to the VI semester (for 4 semesters). Successful completion of the registered course and requisite CIE score is mandatory for the award of the degree. The events shall be appropriately scheduled by the colleges and the same shall be reflected in the calendar prepared for the NSS, PE, and Yoga activities. These courses shall not be considered for vertical progression as well as for the calculation of SGPA and CGPA, but completion of the course is mandatory for the award of degree.

# **Mathematics for Computer Science**

		<b>A</b>	
Course Code	22MATS31	CIE Marks	50
Course Type	Theory	SEE Marks	50
Teaching Hours/Week (L: T: P: S)	2:2:0:0	Total Marks	100
Total Hours of Pedagogy	40 hours	Exam Hours	03
		Credits	03

#### **Course objectives:**

The goal of the course Mathematics for Computer Science is to,

- 1. Introduce the concept of random variables, probability distributions, specific discrete and continuous distributions with practical application in Computer Science Engineering and social life situations.
- 2. Provide the principles of statistical inferences and the basics of hypothesis testing with emphasis on some commonly encountered hypotheses.
- 3. Determine whether an input has a statistically significant effect on the system's response through ANOVA testing.

### **Teaching-Learning Process (General Instructions)**

# These are sample Strategies, which teacher can use to accelerate the attainment of the various course outcomes.

- **1.** In addition to the traditional lecture method, different types of innovative teaching methods may be adopted so that the delivered lessons shall develop students theoretical and applied mathematical skills.
- **2.** State the need for Mathematics with Engineering Studies and Provide real-life examples.
- 3. Support and guide the students for self-study.
- **4.** You will also be responsible for assigning homework, grading assignments and quizzes, and documenting students' progress.
- 5. Encourage the students for group learning to improve their creative and analytical skills.
- **6.** Show short related video lectures in the following ways:
  - As an introduction to new topics (pre-lecture activity).
  - As a revision of topics (post-lecture activity).
  - As additional examples (post-lecture activity).
  - As an additional material of challenging topics (pre-and post-lecture activity).
  - As a model solution of some exercises (post-lecture activity).

#### Module-1

### **Probability Distributions:**

Review of basic probability theory. Random variables (discrete and continuous), probability mass and density functions. Mathematical expectation, mean and variance. Binomial, Poisson and normal distributions- problems (derivations for mean and standard deviation for Binomial and Poisson distributions only). 8 Hours.

# [Text 1: 26.1, 26.2, 26.7, 26.8, 26.9, 26.10, 26.13, 26.14, 26.15, 26.16]

# [RBT Levels: L1, L2 and L3]

**Self-Study:** Exponential distribution.

**Applications:** Used for Modeling and prediction, analyzing data, algorithm design, cryptography, error detection, machine learning, computer vision, computer graphics, random number generation and natural language processing.

	Module-2
Joint probability distribution & Markov	
	bility distribution for two discrete random variables,
Markov Chain: Introduction to Stochastic	Process, Probability Vectors, Stochastic matrices, Regular transition probabilities, Stationary distribution of Regular
Markov chains and absorbing states.	
[Text 3: 8.1, 8.2, 8.3, 8.4, 8.5, 8.6, 5.6, 5.7]	
[RBT Levels: L1, L2 and L3]	
<b>Self-Study:</b> Joint Probability distribution for	two continuous random variables. 1 design and maintenance decisions. Markov chain for
algorithmic design and networking.	i design and maintenance decisions. Markov chain for
	8 Hours
	Module-3
Statistical Inference 1:	
	d error, testing of hypothesis, levels of significance, test of
	pling of attributes, test of significance for large samples,
comparison of large samples. Sampling vari	ables, central limit theorem and confidence limit for
unknown mean. Test of Significance for m	eans of two large samples.
[Text 1: 27.1, 27.2, 27.3, 27.4 27.5, 27.6, 27	7.7, 27.8, 27.9, <b>27.10, 27.11, 27.12</b> ]
[RBT Levels: L1, L2 and L3] Self-Study:	
<b>Applications:</b> Decision making and problem	
	8 Hours Module-4
Statistical Inference 2:	Woulle-4
	nts 't' distribution, Chi-square distribution as a test of
goodness of fit. F-Distribution.	this i distribution, can square distribution us a test of
[Text 1: 27.13, 27.14, 27.15, 27.16, 27.17, 2	27.18.27.191
[RBT Levels: L1, L2 and L3]	
Self-Study: Fisher's Z-Distribution.	
<b>Applications:</b> Algorithm performance evaluation assurance, Biometric systems, Network security	ation, Software testing, Hardware testing, Quality rity, database management, Biomedical informatics,
Information retrieval, signal processing and i	mage processing. 8 Hours
	Module-5
	alysis of completely randomized design, randomized block ciple of ANOVA, One-way ANOVA, Two-way ANOVA, ariance.
[Text 1:]	
[RBT Levels: L1, L2 and L3]	
Self-Study:	ork porformance Database management User emericus
	ork performance, Database management, User experience
design and Hardware design.	8 Hour
Tooghing Looming Drogoes for all	
Teaching-Learning Process for all modules	Chalk and Talk/PowerPoint presentation/YouTube videos.
inouules	presentation/ rou rube videos.

### **Course Outcomes (Course Skill Set):**

After successfully completing the course, the students will be able to:

CO1: Understand the basic concepts of probability, random variables, probability distribution and apply suitable probability distribution models for the given scenario.

CO2: Learn the concept of joint distribution and make use of the notion of a discrete-time Markov chain and n-step transition probabilities to solve the engineering application problem

CO3: Use statistical methodology and tools in the sampling analysis.

CO4: Compute the confidence intervals for the mean of the population by using different tests.

CO5: Apply the ANOVA test related to engineering problems.

Evalua	ition Type	Component	Max Marks	Marks Reduced to	Min. Marks	Evaluation Details
	Internal Assessment	IAT-1	25	25		Average of two IATs, Scaled down to 25 marks
Theory Component	Tests (IAT)	IAT-2	25	25		
	Comprehensive Continuous	CCE-1	25		20	Any two Assessment methods as per 220B4.2
	Evaluations (CCE)	CCE-2	25	25		of regulations. Average of two CCEs, scaled down to 25 marks
	Total CIE -	Гheory		50	20	
	SEE		100	50	18	Conducted for 100 marks And scaled down to 50.
	CIE + SEE			100	40

Total Hours of Pedagogy	40 hours Theory 10 hours Laboratory	Total Marks	100						
Credits	03	Exam Hours	03						

**Course objectives:** 

#### This course will enable students to:

- Understand the basics of pointers and dynamic memory allocation.
- Learn concepts of structure and its application in programming.
- Gain knowledge to choose the specific linked lists for implementing real world problems.
- Grasp the use of stacks and queues in solving complex problems.
- Acquire knowledge of non linear data structure like trees.

#### **Teaching-Learning Process (General Instructions)**

These are sample Strategies, which teacher can use to accelerate the attainment of the various course outcomes.

- 1. Lecture method (L) does not mean only traditional lecture method, but different type of teaching methods may be adopted to develop the outcomes.
- 2. Show Video/animation films to explain evolution of communication technologies.
- 3. Encourage collaborative (Group) Learning in the class
- 4. Ask at least three HOTS (Higher order Thinking) questions in the class, which promotes critical thinking.
- 5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop thinking skills such as the ability to evaluate, generalize, and analyze information rather than simply recall it.
- 6. Show the different ways to solve the same problem and encourage the students to come up with their own creative ways to solve them.
- 7. Discuss how every concept can be applied to the real world and when that's possible, it helps improve the students' understanding.

#### Module-1

**Introduction:** Data Structures, Classifications (Primitive & Non Primitive), Abstract Data Types(ADT)-Array, Structures, Self-Referential Structures and Unions, Arrays Review. Pointers and Dynamic Memory Allocation Functions. Pointer as function arguments, Functions returning pointers. **Textbook 1**: Chapter 1: 1.2; Chapter 2: 2.1 - 2.6;

**Textbook 2**: Chapter 1: 1.1 - 1.4; Chapter 4: 4.1 - 4.8;

**08 Hours** 

#### Module-2

**Recursion:** Introduction to Recursion, Examples of Recursion: Factorial, Fibonacci Sequence, Tower of Hanoi

Stacks: Definition, ADT-Stack, Array Representation of Stacks along with Stack Operations, Stack

Applications: Polish notation, Infix to Postfix conversion, Infix to Prefix conversion, Evaluation of postfix expression.
Textbook 1: Chapter 3: 3.1 - 3.7;
Textbook 2: Chapter 6: 6.1 - 6.3, 6.5-6.14;

08 Hours

**08 Hours** 

#### Module-3

**Queues:** Definition, ADT-Queue, Array Representation, Queue Operations, Circular Queues, Programming Examples.

**Linked Lists:** Definition, Representation of linked lists in Memory, Memory allocation; Garbage Collection. Linked list operations: Traversing, Searching, Insertion, and Deletion. Stacks and Queues implementation using Linked Lists. Programming Examples.

**Textbook 1:** Chapter 4: 4.1–4.3, 4.7 - 4.8;

1 - 5.9;

#### Module-4

**Doubly Linked Lists, Circular lists:** Doubly Linked lists, Circular Singly and Doubly linked lists; Basic operations: Insert, Delete and Display with programming examples. Application: Adding Polynomials.

**Textbook 1:** Chapter 4: 4.4 – 4.5; Chapter 8: 8.1 - 8.2; **Textbook 2:** Chapter 5: 5.10

Textbook 2: Chapter 5: 5.10

Module-5

**Trees:** Terminology, Binary Trees, Properties of Binary trees, Array and linked Representation of Binary Trees, Binary Tree Traversals - Inorder, Postorder, Preorder; Binary Search Trees – Definition, Insertion, Deletion, Traversal, Searching, Application: Evaluation of Expression. **Textbook 1:** Chapter 5: 5.1 - 5.3, 5.5, 5.7;

#### **08 Hours**

**08 Hours** 

Teaching-Learning Process for all modules	Chalk and Talk, PowerPoint presentation, flip teaching, YouTube videos

#### LIST OF LABORATORY PROGRAMS

Design, develop and execute a program in C based on the following requirements: An
EMPLOYEE structure is to contain the following members: Employee\_Number (an integer), Employee\_Name (a string of characters), Basic\_Salary (an integer), All\_Allowances (an integer), IT (an integer), Net\_Salary (an integer). Write a function to read the data of an employee, to calculate Net\_Salary and to print the values of all the structure members. (All\_Allowances = 123% of Basic, Income Tax (IT) = 30% of the gross salary ( gross salary = Basic\_Salary + All\_Allowance), Net\_Salary = Basic\_Salary + All\_Allowances –IT). Display the above data for at least 5 employees.

<ul> <li>Roll_No at a given valid position (POS) using pointers. Display the status of array elements at any given point of time. Support the program with functions for each operations.</li> <li>Develop an array implementation on stack and perform Push and Pop operations. Check for overflow and underflow conditions. Demonstrate stack implementation to check palindrome. Display the status of the stack for all the operations performed. Support the program with appropriate functions for each of the above operations.</li> <li>Write a Program in C: <ul> <li>a. Evaluate the Suffix (Postfix) expression with single digit operands and operators.</li> </ul> </li> <li>Implement Circular QUEUE program in C for rainbow colors (VIBGOYR) and perform Insert and Delete operations. Check for overflow and underflow conditions. Display the status of the Circular QUEUE for all the operations performed. 3       Develop an array implementation on stack and perform Push and Pop operations. Check for overflow and underflow conditions. Demonstrate stack implementation to check palindrome. Display the status of the stack for all the operations performed. Support the program with appropriate functions for each of the above operations.         4       Write a Program in C:       a. Evaluate the Suffix (Postfix) expression with single digit operands and operators.         5       Implement Circular QUEUE program in C for rainbow colors (VIBGOYR) and perform Insert and Delete operations. Check for overflow and underflow conditions. Display the status of the Circular QUEUE for all the operations performed. Use pointers and functions.         6       Implement a Menu driven Program in C for the following operations on Singly Linked List (SLL) of Student Data with the fields: USN, Name, Avg_Marks         6       a. Create N number of Students Data by inserting at end of the list.         7       Design and Develop following operations on Doubly Linked List (DLL) of Employee Data with the fields: SSN, Name, Dept etc.         8       Create a Node of N Employees Data by inserting in front.         9       Insert a new node to the right of key value.         9       Perform Insertion and Deletion at End of DLL         10       Display the status of DLL and count the number of nodes         11       Design and Develop a program in C for the following operations on Binary Search Tree (BST) of Integers.         13       Create a BST of N Integers         14       Disp		
for overflow and underflow conditions. Demonstrate stack implementation to check palindrome. Display the status of the stack for all the operations performed. Support the program with appropriate functions for each of the above operations.         4       Write a Program in C:       a. Evaluate the Suffix (Postfix) expression with single digit operands and operators.         5       Implement Circular QUEUE program in C for rainbow colors (VIBGOYR) and perform Insert and Delete operations. Check for overflow and underflow conditions. Display the status of the Circular QUEUE for all the operations performed. Use pointers and functions.         5       Implement a Menu driven Program in C for the following operations on Singly Linked List (SLL) of Student Data with the fields: USN, Name, Avg_Marks         6       a. Create N number of Students Data by inserting at end of the list.         b. Insert and Delete at front of the list       c. Delete at the end of list         d. Display the status of SLL       d. Demonstration stack and queue         e. Exit       a. Create a Node of N Employees Data by inserting in front.         b. Insert a new node to the right of key value.       c. Perform Insertion and Deletion at End of DLL         d. Display the status of DLL and count the number of nodes       e. Exit         B       Design and Develop a program in C for the following operations on Binary Search Tree (BST) of Integers.         a. Create a BST of N Integers       b. Traverse the BST using Inorder, Preorder and Post Order techniques         c. Search a KEY element in	3	•

c. Search a KEY element in BST and display the appropriate message		a. Create a BST of N Integers
		b. Traverse the BST using Inorder, Preorder and Post Order techniques
rse Outcomes		c. Search a KEY element in BST and display the appropriate message
rse Outcomes		
	urse	Outcomes

At the end of the course the student will be able to :

- CO1: Explore pointers and heterogeneous datatypes
- CO2: Implement linear data structures, stack and Queue in solving real time scenario
- CO3: Demonstrate various operations of singly and doubly linked Lists
- CO4: Analyze usage of circular lists for application oriented problems.
- CO5: Apply the concept of non-linear data structures trees

Assessment Detail	s (both CIE ar	nd SEE)				
Evaluation Type	Compone nt	Max. Mark s	Marks Reduced To	Min Mark s	Evaluation Details	
Internal Assessment Test (IAT)	IAT 1 IAT 2	25 25	25	2	Average of two IATs, Scaled down to 25 Marks	
Comprehensive Continuous Evaluation (CCE)	CCE-1 CCE-2	25 25	25	20	Minimum of two Assessment Methods as per 22OB4.2 of regulation. Average of CCEs, Scaled down to 25	
Total C	CIE	-	50	20	Scaled down Marks of IAT and CCE to 25	
SEE		100	50	18	Conducted for 100 Marks and Scaled down to 50	
CIE + S	EE	-	100	40

· · · · · · · · · · · · · · · · · · ·		(	08 Hours
	Module – V		
	String Handling: What are three nplementing runnable, Synchroniz		

threadable, Extending threads, Implementing runnable, Synchronization. String Handling: String Constructors, String Operations, Character Extarction, String Comparision (Chapter 11 and 15 of Text 1) 08 Hours

	Lab Programs
1.	A. Develop a Java program for an advanced arithmetic calculator that takes two integer operands and an operator from the user. The program should be capable of performing addition, subtraction, multiplication, and division. Ensure that the program handles input validation, including checking for the validity of the operator and non-negative values for the operands. After each calculation, ask the user if they want to perform another operation and provide a history of previous calculations upon request.
	<ul> <li>B. Write a Java program to generate the first 'n' terms of the Fibonacci series and determine the following: <ol> <li>Calculate the sum of all even terms in the series.</li> </ol> </li> <li>Find the product of all odd terms in the series.</li> <li>Check and display the largest prime number within the series.</li> <li>Calculate the average of the entire series.</li> </ul>
2.	<ul> <li>A. Develop a Java program showcasing method overloading with a base class "Phone" containing the dial() method, and two subclasses "CameraPhone" and "SmartPhone" that inherit from the base class and enhance its features. The program should demonstrate and print the results of these enhancements</li> <li>B. Develop a Java program illustrating constructor overloading for calculating the area of a rectangle and a circle using appropriate constructors.</li> </ul>
3.	<ul> <li>A. Create a Java program with a vehicle hierarchy, including Vehicle, Car, SportsCar, and Truck classes. Implement methods for starting and stopping in the base class and specialized methods for accelerating, adding turbo boost, and loading cargo in the subclasses, with appropriate method overrides.</li> <li>B. Create a Java program that models electronic devices (e.g., smartphones, laptops, and tablets) using a common interface for power management. The program should allow users to interact with the devices and control their power state.</li> </ul>
4.	<ul> <li>A. Develop a Java program that emulates a library system. Create two packages, `library` and `patron`. In the `library` package, define a `Book` class with a private title field. In the `patron` package, implement a `Patron` class that can borrow books. Demonstrate the use of packages, access protection, and class imports. Ensure that the book title remains inaccessible from outside the `library` package due to the `private` access modifier. Create a scenario where a patron, Alice, borrows a book from the library.</li> <li>B. Develop a Java lab program that handles exceptions for division by zero and invalid input. Use `try-catch` blocks to catch `ArithmeticException` for division by zero and `InputMismatchException` for non-integer input and provide user-friendly error messages.</li> </ul>
5.	<ul> <li>A. Write a Java program that implements a multi-thread application that has three threads. First thread generates a random integer for every 1 second; second thread computes the square of the number and prints; third thread will print the value of cube of the number.</li> <li>B. Design a Java lab program to demonstrate string handling, including creating strings using constructors and literals, concatenating strings, extracting characters at a specified index, and comparing strings for equality.</li> </ul>

#### **Course Outcomes:**

CO1: Explain the basic concepts of object-oriented programming.

CO2: Analyse the working of JAVA Programming using classes and objects.

CO3: Implementation of Inheritance and Interfaces.

CO4: Expose to the concepts of Packages and Exceptions that occur while programming in JAVA.

CO5: Develop the multi-threaded programming and String handling in JAVA.

#### Assessment Details (both CIE and SEE)

Evaluation Type	Component	Max. Marks	Marks Reduced To	Min Marks	<b>Evaluation Details</b>

Logic Design and Computer Organization											
Course Code22IST34CIE Marks50											
Teaching Hours/Week(L: T:P:S)	3:0:0:0	SEE Marks	50								
Total Hours of Pedagogy	40 Hours	Total Marks	100								
Credits	03	Exam Hours	03								

#### **Pre-Requisites:**

Students must be aware of basic Logic gates like AND, OR and NOT. Students should have the knowledge of Digital logic and its design and computer concepts like what is keyboard, mouse, monitor, input, output, primary memory and secondary memory etc.

**Course Objectives :** 

#### The Student will:

- 1. Make use of simplifying techniques in the design of combinational circuits.
- 2. Illustrate combinational and sequential digital circuits.
- 3. Understand the organization and architecture of computer systems, their structure and operation.
- 4. Illustrate the concept of machine instructions and programs.
- 5. Understand the arithmetic and logical operations.

#### Module I

**Karnaugh maps:** Introduction to Binary logic and digital logic gates. Minimum forms of switching functions, Two and Three variable Karnaugh maps, Four variable Karnaugh maps, Determination of minimum expressions using essential prime implicants,

**Quine-McClusky Method:**Determination of prime implicates, the prime implicant chart, Petricks method, Simplification of incompletely specified functions, Simplification using map-entered variables

#### **08 Hours**

#### Module II

**Combinational circuit**: Review of Combinational circuit design, Hazards in combinational Logic. Multiplexers, Decoders and Programmable Logic Devices: Multiplexers, three state buffers, decoders and encoders, Programmable Logic devices, Programmable Logic Arrays, Programmable Array Logic.

Flip Flops: Introduction, Flip-Flops, D Flip-Flop, S-R Flip-Flop, J-K Flip-Flop, T Flip-Flop

**08 Hours** 

Module III Basic Structure of Computers: Basic Operational Concepts, Bus Structures, Performance – Processor

Clock, Basic Performance Equation, Clock Rate, Performance Measurement.

**Machine Instructions and Programs:** Memory Location and Addresses, Memory Operations, Instructions and Instruction Sequencing, Addressing Modes.

**08 Hours** 

Module IV

**Input/output Organization:**Accessing I/O Devices, Interrupts – Interrupt Hardware, Direct Memory Access, Buses, Interface Circuits.

**08 Hours** 

#### Module V

#### **Computer Airthmetic**

Arithmetic: Addition and Subtraction of signed numbers, Design of Fast Adders, Multiplication of positive Numbers, Signed Operand Multiplication, Fast Multiplication, Integer Division floating –point Numbers and Operations.

#### **08 Hours**

#### **Course outcomes:**

#### The Student will be able to:

CO1: Simplify digital circuits using Karnaugh Map, and Quine-McClusky Methods.

CO2: Design various synchronous and asynchronous circuits using flip flops.

CO3: Describe the structure of computer and its basic processing unit with instruction set.

CO4: Analyze the input/output devices communicating with computer system.

CO5: Apply algorithms to perform arithmetic and logical operations, solve problems using computer performance equations.

#### **Course Objectives:**

1. Motive students to work on literature survey, to understand the domain of their interest preferable in advanced and emerging technologies.

2. Summarize the literature survey and finalize their project work under selected domain.

3. Develop team work & presentation skills, and prepare the report.

#### **Course Content:**

- Survey and study of published literature on the assigned topic related to emerging technologies like machine learning, Cyber security, Data Science, Web technologies etc.
- Working out a preliminary Approach to the Problem relating to the assigned topic.
- Preparing a written report on the Study conducted for presentation to the Department.
- Final Seminar, as oral Presentation before a Departmental Committee.

Assessment Details (both CIE and SEE)	
Parameter	Marks
Formation of team, selection of domain and submission of Synopsis	12
Carry out literature survey	10
Design and development, Preparation of the report	18
Rubrics based evaluation of Presentation and Viva	10
CIE Total Marks	50
Final Exam will be conducted for 50 marks (SEE)	<b>I</b>
Total	100

#### **Course Outcomes**

- **CO1** Review the current state of Art and trends in their area of interest in current technologies and identify a suitable problem in their chosen subject domain with justification.
- CO2 Survey the available research literature/documents for the tools and techniques to be used.
- **CO3** Examine the functional, non-functional, and performance requirements of their chosen problem definition.
- **CO4** Design system architecture and different components and develop all the system components using appropriate tools and techniques.
- **CO5** Work effectively in a team and use good project management practices and defend the project work as a team.

#### Module V

**Strategic Security:** Introduction, Developing a Strategic Security Process, IT Strategic planning process, Tools & methodologies of IT strategic planning, Business system planning approach.

**Facilities management:** Introduction, Major Elements of Facilities Management, Tips to improve facilities management process.

#### **Course outcomes:**

#### The Student will be able to:

- **CO1:** Investigate, critically analyse and evaluate the impact of new and current ICT services to an organization.
- **CO2:** Demonstrate the technical and communications skills that contribute to the operation of ICT services in an organization.
- **CO3:** Explain critically the role of an enterprise architect in an organization.
- CO4: Gain Knowledge on theoretical, technical and management issues that deliver ICT services to an organization
- **CO5:** Analyse how effective IT Infrastructure Management requires strategic planning with alignment from both the IT and business perspectives in an organization.

#### Prerequisite:

Basic Probability concepts

#### **Course Learning Objectives:**

This course will enable students to:

CLO 1: Understand the basics of business and economy

CLO 2: Learn the basics ethics of entrepreneurship and how to start a business.

CLO 3: Understand the roles of ownership, management and leadership.

CLO 4: Learn how to design an organization and its operations.

CLO 5: Understand the roles and management of human resource in an organization.

**Teaching-Learning Process(General Instructions)** 

These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.

- 1. Lecturer method (L) need not to be only traditional lecture method, but alternative effective teaching methods could be adopted to attain the outcomes.
- 2. Use of Video/Animation to explain functioning of various concepts.
- 3. Encourage collaborative (Group Learning) Learning in the class.
- 4. Ask at-least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.
- 5. Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop design thinking skills such as the ability to design, evaluate, generalize, and analyze information rather than simply recall it.
- 6. Introduce Topics in manifold representations.
- 7. Show the different ways to solve the same problem and encourage the students to come up with their own creative ways to solve them.
- 8. Discuss how every concept can be applied to the real world-and when that's possible, it helps to improve the students' understanding.

#### Module– I

#### **Teamwork & Economics**

**Teamwork in Business**, The Foundation of Business – Introduction, Getting Down to Business, Functional Areas of Business, External Forces that Influence Business Activities

**Economics and Business** - What is Economics? Perfect Competition and Supply and Demand, Monopolistic Competition, Oligopoly, and Monopoly, Measuring the Health of the Economy, Government's Role in Managing the Economy

**08** hours

Textbook1: Chapter 1 & 2 Teaching Learning Methodology: Chalk & Talk, Demo using Python IDE Module-II Ethics and Entrepreneurship Ethics – Introduction, What is Business Ethics? Identifying Ethical Issues and Dilemmas, Corporate Social Responsibility, Ethical Organizations, The Individual Approach to Ethics Entrepreneurship - The Nature of Entrepreneurship, The Importance of Small Business to the U.S. Economy, What Industries Are Small Businesses In? Advantages and Disadvantages of Business Ownership, Starting a Business, Why Some Businesses Fail and Where to Get Help 08 hours **Textbook1: Chapter 3, 4, 5 & 6** Teaching Learning Methodology: Chalk & Talk, Problem based learning: https://onlinecourses.nptel.ac.in/noc19\_ee53/ Module-III **Ownership**, Management and Leadership Ownership - The Ice Cream Men, Factors to Consider, Mergers and Acquisitions Management and Leadership - Noteworthy Management, What Do Managers Do?, Planning, Leading, Controlling, Managerial Skills, Applying Your Skills at Notes-4-You 08 hours **Textbook1: Chapter 7** Teaching Learning Methodology: Chalk & Talk, Problem based learning: https://onlinecourses.nptel.ac.in/noc19\_ee53/ Module-IV Organizational structures and Operation Management **Organizational structure** – Organizing, Organizational Structure: How companies do the job done **Operation Management** - The Challenge: Producing Quality Jetboards, Operations Management in Manufacturing, Managing the Production Process in a Manufacturing Company, Graphical Tools: Gantt and PERT Charts, The Technology of Goods Production, Operations Management for Service Providers, Producing for Quality 08 hours Textbook1: Chapter 8 & 9 Teaching Learning Methodology: Chalk & Talk, Problem based learning: https://onlinecourses.nptel.ac.in/noc22\_ge04/ Module-V Human resources and Motivating employees Motivating Employees – Motivation, Hierarchy of Needs Theory, Two-Factor Theory, Expectancy Theory, Equity Theory Managing Human Resources - Human Resource Management, Developing Employees, What Makes a Great Place to Work? Compensation and Benefits, Performance Appraisal **08 hours** 

Textbook1: Chapter 10 & 11

**Teaching Learning Methodology:** Chalk & Talk, Problem based learning: https://onlinecourses.nptel.ac.in/noc22\_ge04/

#### **Course Outcomes:**

On completion of this course, the students will be able to:

- Design the basics of any business
- Design the rules and social responsibility of an organization.
- Develop the roles of the interrelated functions of management.
- Construct and manage an organization.
- Utilize the human resources effectively by motivating the employees.

Evaluation Type	Component	Max. Marks	Marks Reduced To	Min Marks	Evaluation Details		
Internal Assessment Test (IAT)	IAT 1 IAT 2	25 25	25		Average of two IATs, Scaled down to 25 Marks		
Comprehensive Continuous Evaluation (CCE)	CCE-1 CCE-2	25 25	25	20	Minimum of two Assessment Methods as per 22OB4.2 of regulation. Average of CCEs, Scaled down to 25		
Total C	IE	-	50	20	Scaled down Marks of IAT and CCE to 25		
SEE		100	50	18	Conducted for 100 Marks and Scaled down to 50		
CIE + S	EE	-	100	40			

#### Assessment Details (both CIE and SEE)

#### Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (25 marks). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination(SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

#### **Continuous Internal Evaluation:**

Two Internal Assessment Test each of **25 Marks (duration 01 hour)** 

- 1. First test at the end of 7<sup>th</sup> week of the semester
- 2. Second test at the end of the  $14^{th}$  week of the semester

Comprehensive Continuous Evaluation Tests each of **25Marks** 

- 3. First test at the end of  $4^{th}$  week of the semester
- 4. Second test at the end of 9th week of the semester

The sum of Two Comprehensive Continuous Evaluation tests, two Internal Assessment Test will be out of 100 marks and will be **Scaled down to 50marks** (to have a less stressed CIE, the portion of the syllabus should not be

common / repeated for any of the methods of the CIE. Each method of CIE should have a different syllabus portion of the course).

CIE methods/question paper has to be designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

## Semester End Examination:

Theory SEE will be conducted by the institute as per the scheduled time table, with common question

#### **Course Learning Objectives**

CLO 1. To learn the foundations of Human Computer Interaction.

CLO 2. To become familiar with the design technologies for individuals and persons with disabilities.

CLO 3. To be aware of mobile HCI.

CLO 4. To learn the guidelines for user interface.

CLO 5. Develop meaningful user interface.

#### Module - I

#### Introduction:

Importance of user Interface – definition, importance of good design. Benefits of good design. A brief history of Screen design. The graphical user interface – popularity of graphics, the concept of direct manipulation, graphical system, Characteristics, Web user – Interface popularity, characteristics-Principles of user interface.

#### Design Process & Screen Designing:

Design process – Human interaction with computers, importance of human characteristics human consideration, Human interaction speeds, understanding business junctions.

Module - II

Screen Designing: Design goals – Screen planning and purpose, organizing screen elements, ordering of screen data and content – screen navigation and flow – Visually pleasing composition – amount of information – focus and emphasis – presentation information simply and meaningfully – information retrieval on web – statistical graphics – Technological consideration in interface design.

Module - III

# Windows and Components

Windows – New and Navigation schemes selection of window, selection of devices based and screenbased controls. Components – text and messages, Icons and increases – Multimedia, colors, uses problems, choosing colors.

**08 Hours** 

**08 Hours** 

**08 Hours** 

**08 Hours** 

#### Module - IV

#### **HCI in the Software Process**

HCI in the software process, The software life cycle Usability engineering Iterative design and prototyping Design Focus: Prototyping in practice Design rationale Design rules Principles to support usability Standards Golden rules and heuristics HCI patterns Evaluation techniques, Goals of evaluation, Evaluation through expert analysis, Evaluation through user participation, Choosing an evaluation method. Universal design, Universal design principles Multi-modal interaction.

**Cognitive Models** 

#### Module - V

Cognitive models Goal and task hierarchies Design Focus: GOMS saves money Linguistic models The challenge of display-based systems Physical and device models Cognitive architectures Ubiquitous computing and augmented realities Ubiquitous computing applications research Design Focus: Ambient Wood – augmenting the physical Virtual and augmented reality Design Focus: Shared experience Design Focus: Applications of augmented reality Information and data visualization Design Focus: Getting the size right.

**08 Hours** 

Teaching-Learning Process	Chalk and board, Active Learning, Demonstration, Web content, Case Study
Course Outcomes	

#### **Course Outcomes**

On completion of this course, the students will be able to,

CO1: Design effective dialog for HCI.

CO2: Design effective HCI for individuals and persons with disabilities.

CO3: Explain the HCI implications for designing multimedia/ ecommerce/ e-learning Web sites.

CO4: Assess the importance of user feedback.

CO5: Design and develop meaningful user interface.

Social Connect and Responsibility								
Course Code	22UHV37	CIE Marks	100					
Teaching Hours/Week(L: T:P:S)	(0:0:2:0)	SEE Marks	-					
Total Hours of Pedagogy	28 Hours	Total Marks	100					
Credits	01	Exam Hours	-					

### Course objectives: The course will enable the students to:

- Provide a formal platform for students to communicate and connect to the surrounding.
- Create a responsible connection with the society.
- Understand the community in general in which they work.
- Identify the needs and problems of the community and involve them in problem –solving.
- Develop among themselfes a sense of social & civic responsibility & utilize their knowledge in finding practical solutions to individual and community problems.
- Develop competence required for group-living and sharing of responsibilities & gain skills
- In mobilizing community participation to acquire leadership qualities and democratic attitudes.

#### Syllabus Module – I

### Plantation and adoption of a tree:

Plantation of a tree that will be adopted for four years by a group of BE / B.Tech students. (ONE STUDENT ONE TREE) They will also make an excerpt either as a documentary or a photo blog describing the plant's origin, its usage in daily life, its appearance in folklore and literature - Objectives, Visit, case study, report, outcomes.

## Module – II

### Heritage walk and crafts corner:

Heritage tour, knowing the history and culture of the city, connecting to people around through their history, knowing the city and its craftsman, photo blog and documentary on evolution and practice of various craft forms - – Objectives, Visit, case study, report, outcomes.

## Module – III

### Organic farming and waste management:

efulness of organic farming, wet waste management in neighboring villages, and plementation in the campus – Objectives, Visit, case study, report, outcomes.

### Module – IV

### Water conservation:

Knowing the present practices in the surrounding villages and implementation in the campus, documentary or photoblog presenting the current practices – Objectives, Visit, case study, report, outcomes.

Module-V

## Foods walk:

City's culinary practices, food lore, and indigenous materials of the region used in cooking – Objectives, Visit, case study, report, outcomes.

#### **Course Outcomes:**

At the end of the course, the student will be able to:

- **CO1:** Communicate and connect to the surrounding.
- **CO2:** Create a responsible connection with the society.
- **CO3:** Involve in the community in general in which they work.
- **CO4:** Develop among them of social & civic responsibility & utilize their knowledge in finding practical solutions to individual and community problems.
- **CO5:** Develop competence required for group-living and sharing of responsibilities & gain skills in mobilizing community participation to acquire leadership qualities and democratic attitudes.

# **Pedagogy – Guidelines:**

It may differ depending on local resources available for the study as well as environment and climatic differences, location and time of execution.

Sl No	Торіс	Groupsize	Location	Activity execution	Reporting	Evaluation Of the Topic
1.	Plantation and adoption of a tree:	May be individua lor team	Farmers land/ parks / Villages / roadside/ community area / College campus etc	Site selection /proper consultation/Continu ous monitoring/ Information board	Report should be submit by individual to the concerned evaluation authority	Evaluation as per the rubricsOf scheme and syllabus by Faculty

# **Activities:**

Jamming session, open mic, and poetry: Platform to connect to others. Share the stories with others. Share the experience of Social Connect. Exhibit the talent like playing instruments, singing, one-act play, art-painting, and fine art.

# **PEDAGOGY:**

The pedagogy will include interactive lectures, inspiring guest talks, field visits, social immersion, and a course project. Applying and synthesizing information from these sources to define the social problem to address and take up the solution as the course project, with your group. Social immersion with NGOs/social sections will be a key part of the course. Will all lead to the course project that will address the needs of the social sector.

# **COURSE TOPICS:**

The course will introduce social context and various players in the social space, and present approaches to discovering and understanding social needs. Social immersion and inspiring conversional will culminate in developing an actual, idea for problem-based intervention, basedon an in-depth understanding of a key social problem.

Duration:

A total of 40 - 50 hrs engagement per semester is required for the 3rd semester of the B.E./ B.Tech. Program. The students will be divided into groups. Each group will be handled by faculty mentor. Faculty mentor will design the activities (particularly Jamming sessions open mic, and poetry) Faculty mentors has to design the evaluation system as per VTU guidelines of scheme & syllabus.

Guideline for Assessment Process:

### **Continuous Internal Evaluation (CIE):**

After completion of the course, the student shall prepare, with daily diary as reference, a comprehensive report in consultation with the mentor/s to indicate what he has observed and learned in the social connect period. The report should be signed by the mentor. The report shall be evaluated on the basis of the following criteria and/or other relevant criteria pertaining to the activity completed. Marks allotted for the diary are out of 50. Planning and scheduling the social connect Information/Data collected during the social connect Analysis of the information/data and report writing Considering all above points allotting the marks as mentioned below

Excellent Good Satisfactory : 80 to 100 : 60 to 79 : 40 to 59Unsatisfactory and fail: <39

Introduction to MATLAB / SCILAB								
Course Code	22ISL38B	CIE Marks	50					
Teaching Hours/Week (L: T:P:S)	0:0:2:0	SEE Marks	50					
Total Hours of Pedagogy	-	Total Marks	100					
Credits	01	Exam Hours	03					

**SCILAB** stands for *SCIENTIFIC LABORATORY* is an *open-source alternative* to MATLAB. SCILAB is free and open-source software for numerical computation providing a powerful computing environment for engineering and scientific aplications. SCILAB software is used for performing numerical computation. It is used in all major scientific areas such as space, aeronautics, defense, finance, etc.

# **Course Objectives:**

- 1. To become familiar with SCILAB programming environment including Maths & Simulation for usual engineering and science applications including mathematical operations and data analysis.
- 2. To implement elementary mathematical functions, polynomial arithmetic, scalar and vector operations.
- 3. To develop programming for 2-D & 3-D Visualization Graphics functions to visualize, annotate and export data and many ways to create and customize various types of plots and charts.
- 4. To develop optimization Algorithms to solve constrained and unconstrained continuous and discrete optimization problems.
- 5. To explore the statistics tools to perform data analysis and modeling.

# **Course Content:**

# Programs/Assignment on:

- 1. SCILAB Introduction and Vector Operations, Variables and Matrix Operations
- 2. Conditional Branching, Iterations and Loops Scripts Functions
- 3. Toolboxes and SCILAB Applications using Garuda Cloud
- 4. 2D, 3D Graphs and Advanced Plotting Commands
- 5. Image Processing Toolbox and Implementation of Face and Eye Detection Techniques
- 6. Curve Fitting, Polynomials and Differential Equations with OpenCV/ SCILAB
- 7. Simulation using XCOS
- 8. Numerical Optimization Techniques and Artificial Intelligence

## **Course Outcomes**

**CO1:** Explain the SCILAB programming environment to solve given problem.

**CO2:** Develop algorithms to implement elementary mathematical functions, polynomial arithmetic, scalar and vector operations.

**CO3:** Analyze the working of 2D, 3D Graphs and Advanced Plotting.

**CO4:** Designing the optimization techniques for efficient solutions.

CO5: Implementation of SCILAB programs to solve real world problems.

# Assessment Details (both CIE and SEE)

Introduction to Office Tools								
22ISL38C	CIE Marks	50						
0:0:2:0	SEE Marks	50						
-	Total Marks	100						
01	Exam Hours	03						
	22ISL38C 0:0:2:0	22ISL38CCIE Marks0:0:2:0SEE Marks-Total Marks						

### **Course Objectives:**

- 1. Attain a comprehensive understanding of Microsoft Office tools including Word, Excel, PowerPoint, and potentially others like Access, Outlook, or Publisher.
- 2. Learn how to use Office tools effectively to increase productivity in academic, professional, and personal tasks.
- 3. Develop the ability to adapt and apply acquired skills to different scenarios and tasks requiring Office applications.

## **Course Content:**

## **Programs/Assignment on:**

## Microsoft Word:

- 1. Using MS WORD formatting tools like font styles, sizes, colors, alignment, and line spacing.
- 2. Using MS WORD Create and customize document templates for different purposes (e.g., resumes, flyers, reports).
- 3. Explore creating and formatting tables, inserting and formatting images, shapes, and SmartArt.
- 4. Introduce basic arithmetic operations, SUM, AVERAGE, MAX, MIN, etc.

## Microsoft PowerPoint:

- 5. Creating Presentations: Cover slide layouts, inserting text, images, shapes, and slide transitions.
- 6. Animation and Multimedia: Practice adding animations, audio, video, and customizing timing.
- 7. Master Slides: Explore using master slides for consistent formatting and design.
- 8. Microsoft Access: Design and create a simple database, define relationships, and run

queries.

- 9. Outlook: Manage emails, calendar appointments, tasks, and rules for organizing mail.
- 10. OneNote: Explore note-taking, organizing information, and collaboration features.
- 11. Publisher: Designing various print materials like newsletters, brochures, or posters.
- 12. SharePoint: Introduction to document management, team sites, and collaboration tools.

## **Course Outcomes**

- **CO1:** Explain the usage of Microsoft Office environment to solve given problem.
- **CO2:** Demonstrate the working of Microsoft Office tools.
- **CO3:** Analyze the working of Word, Excel and PowerPoint settings to create the documents.
- **CO4:** Designing the animated presentation to explore the Critical thinking.
- **CO5:** Implementation of efficient Microsoft Office tools programs to solve real world problems for better productivity.

Introduction to 1	Linux/Unix She	ell Programming			
Course Code	22ISL38D	CIE Marks	50 50		
Teaching Hours/Week (L: T:P:S)	0:0:2:0	SEE Marks			
Total Hours of Pedagogy	-	Total Marks	100		
Credits	01	Exam Hours	03		
Course Objectives:					
This course will enable students to,					
1. Understand effective use of Unix co	oncepts, commands	s and terminology.			
2. Identify, access, and evaluate UNIX	K file system.				
3. Understand UNIX command syntax					
4. Read and understand specifications	, scripts and progra	ams.			
5. Analyze Facility with UNIX Process.					
Course Content:					
ntroduction to Shell scripting:					
<ul> <li>vi, ls, mkdir, rmdir, cd, cat, touc</li> <li>Commands related to inode, I/C</li> <li>Shell Programming: Shell scripts <ul> <li>(i) Interactive shell scripts</li> <li>(ii) Positional parameters</li> <li>(iii) Arithmetic</li> <li>(iv) if-then-fi, if-then- else-fi, ne</li> <li>(v) Logical operators</li> <li>(vi) else + if equals elif, case str</li> <li>(vii) while, until, for loops, use</li> </ul> </li> <li>Programs/Assignment on:</li> </ul>	ested if-else	ping.			
<ol> <li>Write a shell script to check who</li> <li>Write a shell script to add, subtr</li> <li>Write a shell script that accepts of these files are similar or different script in the second script in the se</li></ol>	act, multiply, divid two file names as crent.	le two numbers and add t arguments, and checks th	wo strings. ne permission		
<ol> <li>Write a shell program to perform</li> <li>Write a non-recursive shell scriin a reverse order.</li> </ol>					
6. Write a shell script to check the	•	•			
7. Write a shell script to compute					
8. Write a shell script to find whet	-	-			
9. Write a shell script to check who					
10. Write a shell script to check whe	enter the given sun				

### **Course Outcomes**

CO1: Know the basics of Unix concepts and commands.

**CO2:** Evaluate the UNIX file system.

**CO3:** Apply Changes in file system.

**CO4:** Write scripts and programs.

**CO5:** Analyse Facility with UNIX system process.
