## **Aim of the Session:**

The aim of the session is to provide students with valuable information and guidance regarding core domain job opportunities, English skills enhancement, resume/CV building, profile building activities, case studies on career planning, higher education options, and Indian and international education opportunities. The session aims to empower students to make informed decisions about their careers and educational pathways.

## **Objective:**

1. To help students understand the job opportunities available in various core domains, such as Cloud Computing, Machine Learning, Big Data, AI, IoT, NanoTechnology, Manufacturing Industry, Thermal Industry, Design and Analysis, and Robotics Industry.
2. To introduce students to a patented technique for solving English questions in a mathematical way and reading comprehension strategies.
3. To educate students about common mistakes in resume/CV writing and provide guidance on tailoring resumes for job applications and higher education.
4. To provide students with insights on profile building activities customized for their respective departments.
5. To discuss case studies on strategic career planning and avoiding common mistakes, considering different career paths such as technical and management careers.
6. To present unique and highly specialized technical, managerial, and techno-managerial programs available for higher education.
7. To inform students about Indian and international education opportunities, including exams like GRE, CAT, GMAT, UPSC, and GATE, as well as details about studying abroad, funding options, profile building, and part-time jobs.
