2. Proposal of Scheme and Syllabus from 5<sup>th</sup> to 8<sup>th</sup> semester
3. Proposal of Syllabus of 1<sup>st</sup> and 2<sup>nd</sup> semester MEF and CAED Courses
4. Review of Academic Activities
5. Any other academic points

Dr.N.Kapilan, Chairman welcomed all the BOS Members and staff members for the meeting and he briefed the minutes of meeting of the previous BOS meeting, overview of the scheme and syllabus of other premier institutions and agenda.

Dr.N.Kapilan also explained the methodology followed in drafting the scheme and syllabus for the 5<sup>th</sup> to 8<sup>th</sup> semester of B.E. Mechanical Engineering programme. He also detailed the drafting process where AICTE Model curriculum is considered as base in deciding the credits for the various courses as total credits were reduced from 200 to 175, suggestions received in previous BOS meeting and feedback received from various professional societies, alumni, faculty members and parents.

The staff members in the department were divided in to four different groups based on their specialization like design, thermal, manufacturing and Interdisciplinary. Each group of staff members had thoroughly gone through the scheme and syllabus of premier institutions, VTU, JNTU and other Autonomous colleges. They had series of meetings and debated each syllabus and drafted the final syllabus of their group and send it to the department meeting and department advisory board. Each group have presented their syllabus during department meeting and finally scheme and syllabus was finalized and was forwarded to department advisory committee for the approval. The department advisory committee has gone through the scheme and syllabus and given few suggestions which was accepted. The finalized scheme and syllabus was sent to department BOS meeting.

The chairman of BOS presented the draft scheme and syllabus and the teaching and learning process to be followed for effective student learning processes to the BOS members and requested the BOS members to give their suggestions. After thorough scrutiny of the presented scheme and syllabus the BOS members had made the following comments / suggestions and approved the revised scheme and syllabus.

1. The BOS members appreciated the inclusion of subjects like python for mechanical engineers in 5<sup>th</sup> semester, Applications of IOT in mechanical engineering in 6<sup>th</sup> semester and Machine learning and data analytics as engineering elective in 7<sup>th</sup> semester as suggested in previous BOS meeting.
2. A thorough discussion was done on “python for mechanical engineers” and BOS members approved the same with no corrections and suggested to see that it should be thought by CS or IS department.
3. All the members debated on course “Applications of IOT in mechanical engineering” and finally concluded as the course should be renamed as IIOT (Industrial Internet of Things) with small modifications in the course content.
4. BOS members felt “Machine Learning and Data Analytics” course is very vast and suggested to change the course and limit it to just “Data Analytics”.
5. The BOS members appreciated the integrated course concept that was framed by the department in the areas of Design Engineering, Thermal Engineering and Manufacturing Engineering as they provide good exposure for the students in the respective areas of engineering.
6. The BOS members also suggested to check the possibility of making the 3D printing course as Integrated.
7. The BOS Members suggested include topics of NOISE in mechanical vibration.
8. BOS members asked to check the possibility of reshuffling the subjects like introducing the subjects like HMT and Mechanical Vibrations in 5<sup>th</sup> or 6<sup>th</sup> semester rather than in 7<sup>th</sup> semester which helps students to focus on project work and placements.
9. One of the BOS member MR. Venkanna suggested introducing the HMT course before R&AC course as HMT forms foundation for understanding R& AC.
10. OS members also appreciated the inclusion of courses like Non Destructive Testing, Solar Energy and Design of transmission elements in the curriculum and approved the same.
11. The committee suggests that the students shall select industry internship to enhance their employability.
12. The BOS members appreciated the online courses offered to the students.
13. The BOS members approved the courses Mechanical Engineering Foundation (I C) and Computer Aided Engineering Drawing with no modifications.

Finally all other courses were approved with minor modifications and the scheme and syllabus of 5<sup>th</sup> to 8<sup>th</sup> semester were forwarded to Joint BOS Meeting. The chairman of the BOS thanked all the BOS members and staff for their valuable suggestions and inputs.

**Resolution of the BOS - MBA**  
**Minutes of Board of Studies Meeting held on 14.09.2020**

➤ **Proceedings of the meeting:**

Mrs. Poornima U K, Associate Professor, Department of MBA and Chairperson, Board of Studies, welcomed the members and gave a quick insight of the Curriculum designed for the Academic year 2019-2021 and 2020-2022. The discussions that happened after the presentation are given as follows:

✦ **Agenda Point #1 and 2:** *The new pattern of the Syllabus 2020-2022 was presented by Mrs. Poornima U K, Chairperson, BOS.*

✦ **Agenda Point #2:** *Presentation of III & IV Semester syllabus for 2019-21 Batch of MBA by Mrs. Poornima U K, Chairperson, BOS.*

✦ **Introduction of New Elective (Logistics and Supply Chain Management) for III & IV Semesters.**

1. After the presentation the syllabus of 2019-2021, the syllabus was finalised with minor changes. Those changes were related to the content of the subjects and respective subject matter experts noted them. It was finalised that not to offer Strategic Financial Management paper in finance specialisation and replace it with **Goods and Services Tax (GST)**. This suggestion was given by Dr. P V Raveendra, VTU nominee.

2. After the presentation the syllabus of 2020-2022, the syllabus was finalised with following suggestions:

**Suggestions by Dr. P.V. Raveendra:**

a. Continue with the existing scheme of valuation in which 50% weightage is given to CIE and 50% for SEE. Within CIE, the pattern to be adopted is 60:40 (Test: AAT)

b. The proposed syllabus consists of 3 seminars. He proposed 2 seminars and one course on soft skills for employability. But, in the proposed syllabus it has already been incorporated as zero credit course in all the semesters.

c. Credits offered in total for Internship and Project Work were 16 Credits. He suggested to reduce the credits and introduce a new core paper. It was discussed and finalised to go with the proposed 16 credits for the same.

d. No Marks to be given for attendance was suggested by him and accepted by the Board.

e. Two tests to be given for students for CIE. Makeup CIE can be offered in case of Medical Emergency, any other Genuine reasons and recommended by the counsellors.

**Suggestions by Dr. M.R. Bharadwaj:**

a. Internship and Project work need to be taken seriously by students. It was suggested that there should be a framework external assessment by the guide in organisation and the same should be reflected in assessment rubrics.

b. It was also suggested that once in a fortnight or a month, the concerned guide shall visit the organisation to review the progress. It was finalised by the BOS that visit may be possible for the companies located in and around Bengaluru by the faculty members.

In case of projects undertaken by students other than Bengaluru, project review can be done by the Guide virtually.

c. It was also suggested that if a linkage can be established between Internship and Project work. It was accepted by the BOS and deliberation took place in connection with implementation of it. BOS finalised to go ahead with the linkage provided they get permission from the company well in advance.

**Suggestions by Dr. Harish Babu S:**

a. Dr. Babu appreciated offering of Logistics and Supply Chain Management as specialization for the batches 2019-21 and 2020-22.

b. He suggested to offer Business Analytics as a specialisation for the batch 2020-2022. It was accepted by the BOS and subject matter experts need to be identified to frame the syllabus.

c. He also suggested to include discussions and debates on regular basis for the students on current affairs and that it should be included in the time table. The same was accepted by BOS.

d. MOOC courses may be introduced as an alternative to assignment and it was finalised by the BOS that it shall be included as one of the options for the internal assessment of the students.

e. It was suggested that in every area of specialization one certification course shall be introduced by the industry experts and the same can be included as zero credit course.

**Suggestions by Dr. S G Gopalakrishna:**

a. He stated that offering of two credits for Seminar and the consequent monitoring shall be a tedious task. It was suggested that students shall be put in smaller groups monitored by the counsellor for assessment. The same was reiterated by Dr. Harish Babu and accepted by BOS.

b. Discussion and Debate among students shall be on Current Affairs and the same to be monitored in activity classes. The same was accepted by BOS.

c. The MBA program need to be industry oriented which in turn gives practical exposure and real time experience for the students.

**Suggestions from Members of BOS:**

a. It was suggested by the BOS members that entrepreneurship development activities have to be done by offering certification program/courses by prestigious organisations (Assocham, MSME, CII, SEWA, Skill India) and creating an active ED cell.

b. The Department will consider the option of freelance working or working at NGOs if required, for the final semester projects.

- c. Members of BOS are of the opinion to introduce a greater number of certification courses relevant to the areas of specialization to bridge the skill gap and also to integrate the MOOC courses into the curriculum which are offered by reputed institutions that support blended learning.
- d. It was proposed to introduce a foreign language, as a zero credit course .

All the faculty members were appreciated for their efforts made by the members in drafting the new syllabus considering the current industry requirements.

**3. Introduction of New Elective (Logistics and Supply Chain Management) for III & IV Semesters.**

All the members of the BOS agreed to introduce the new elective.

*Mrs. Poornima U K, Associate Professor, Department of MBA and Chairperson, Board of Studies summarized the discussions in the meeting and proposed the vote of thanks. She also requested the members for their continual support.*

**Resolution of the BOS Meeting – ME**  
**Minutes of Board of Studies Meeting held on 17.07.2019**

The BoS meeting was convened in the Chairman chamber of the Mechanical Engineering Department Board on 17<sup>th</sup> July 2019. Dr. N. Kapilan, Chairman, BoS of Mechanical Engineering Department welcomed the members of the BoS for the meeting.

**Agenda:**

- 1. Scheme and Syllabus for Mechanical Engineering.**
- 2. Suggest Methodologies for innovative teaching and evaluation techniques.**
- 3. Any other academic matter.**

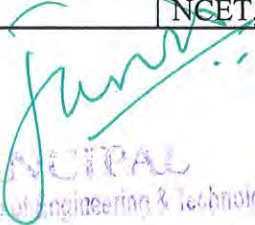

After welcoming all the BoS Members and staff members, Chairman briefed about the proceedings of previous BoS meetings and the inputs received from that and the implementation of the same. He also explained the methodology followed in drafting the scheme and syllabus for the 1<sup>st</sup> and 2<sup>nd</sup> year of B.E. Mechanical Engineering. He also detailed the drafting process where AICTE Model curriculum is considered as base in deciding the credits for the various courses as total credits were reduced from 200 to 175 and feedback received from various professional societies, alumni, faculty members and parents. Keeping all these in view staff members in the department were divided in to different groups based on their specialization like design, thermal, manufacturing and Interdisciplinary. Each group of staff members had thoroughly gone through the scheme and syllabus of premier institutions, VTU, JNTU and autonomous colleges. They had discussion in their group based on the feedbacks received from various stake holders and finally drafted the scheme and syllabus. Each group have presented their syllabus during department meeting and finally scheme and syllabus was finalized.

After explaining the procedure followed in finalizing the draft scheme and syllabus in front of BoS members, the chairman has requested the BoS members to give their suggestions. After through scrutiny of the presented scheme and syllabus the BoS members had made the following comments or suggestions and approved the same.

- 1) Firstly the BoS members appreciated the integrated course concept that was framed by the department in the areas of Design Engineering, Thermal Engineering and Manufacturing Engineering as they provide good exposure for the students in the respective areas of engineering.
- 2) When it comes to Engineering Mathematics-3, they appreciated the change in the syllabus that is brought in, which is more relevant to mechanical engineering with the new title Integral Transforms, but raised their concerns over the number of credits which appears to be less and asked to check the possibility of increasing the teaching hours and credits and approved the same.
- 3) The BoS members suggested to check the possibilities in bringing back the manual drafting in CAMD course which was completely computerized nowadays, As manual sketching gives better understanding and approved the same.
- 4) The BoS Members felt that Automobile engineering-1 is losing its shine and technology shift is observed and hence they suggested to modify the course content and Rename it as Electrical mobility or conventional mobility.

N. from NITK, Surathkal (subject expert from outside the institution). She highlighted about the choice based credit system, which is incorporated in our curriculum. She also explained the scheme and structure to be incorporated in the department syllabi. She emphasized the need to incorporate the scheme and structure framed by the college authorities to maintain uniformity across the departments. The detailed syllabi of III and IV semester were presented before the committee for ratification.

**Resolutions:** The following suggestions were made during discussion.

1. The members studied in detail, the structure of the syllabus of 15IS32. It was found that the time frame fixed was not in accordance to the time frame required to teach appropriate depth level of the subject. Therefore the board approves the reorganization of the time frame.
2. The board studied the credit structure of the subject 15IS361. It was felt that the maturity level of the students may not be sufficient to grasp the subject at this level. At the same time, there was a necessity to place the state of the art "Python" language in some semester. Therefore, the board decides to carry forward this subject to higher semesters with one credit and the gap is filled with "Python Programming".
3. In the subject 15IS34, it was felt that the time frame required to teach the data structure "Queue" may not be sufficient to teach that maturity level of the students. Therefore, the time frame is reorganized.
4. The college has accepted to incorporate 36 credits for industry oriented subjects. The board felt that the industry needs training in various parts of the application. Therefore, it is felt that it is wise to introduce some more knowledge acquisition courses, which can be refined through industry oriented subjects, instead of directly industrial needy subjects.
5. The board ratifies the syllabi of third and fourth semesters of ISE department.
