

Nagarjuna College of Engineering & Technology

(An Autonomous College Under VTU)

Mudugurki, Venkatagiri Kote Post, Devanahalli, Bengaluru – 562110 Approved by A.I.C.T.E / NBA Accredited / Affiliated to VTU

# Scheme for New Courses offered during the Academic Year 2016-17, 2017-18, 2018-19, 2019-20 and 2020-2021

Sl. No	Branch	Page No		
1	Computer Science and Engineering	01-55		
2	Civil Engineering	56-105		
3	Electronics Communication and Engineering	106-154		
4	Information Science and Engineering	156-205		
5	Mechanical Engineering			
6	Civil M. Tech Construction Technology (PG)	285-312		
7	Civil M. Tech Structural Engineering (PG)	313-340		
8	MBA (PG)	341-363		

Nagarjuna College of Engineering & Technology in an Autonomous Institute under Visvesvaraya Technological University. The graduate attributes are as per Outcome Based Education (OBE)/ Choice Based Credit System (CBCS). The new courses offered across all the Programme included Modern Technologies, Skill Development, Industrial orientated courses, Entrepreneurship Humanities and Social Sciences and Employability. The new courses offered during the Academic Year 2016-17, 2017-18, 2018-19, 2019-20 and 2020-2021 are highlighted in Schemes of all Programmes.

# DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

#### VISION

Excellence in creating globally competent professionals and moulding them as leaders in Computer Science & Engineering education and research.

#### MISSION

**M1:** Maintaining excellence in Computer Science & Engineering education through academic professionalism, teaching, curricula which reflect the changing needs of the society.

**M2:** Establishing centre of excellence by creating knowledge through research and industrial exposure in the area of Computer Science & Engineering.

**M3:** Developing communication skill, leadership qualities, team work & skills for continuing education among the students.

**M4:** Inculcating ethics, human values and skills for solving societal problems and environmental protection.

**M5:** Validate engineering knowledge through innovative research projects to enhance their employability and entrepreneurship skills.

# **III to VIII Semesters**

Outcome Based Education (OBE) / Choice Based Credit System (CBCS) Curricula

#### With effect from Academic Year

# 2020 - 21

# **Program Educational Objectives (PEOs)**

The graduates of Computer Science and Engineering are expected to fulfill the following PEOs after a few years of their graduation.

PEO1	Graduates in Computer Science and Engineering will apply the technical knowledge of analysis and design of software used for sustainable societal growth.
PEO2	Graduates of Computer Science and Engineering will demonstrate logical thinking and programming skills.
PEO3	Graduates in Computer Science and Engineering will demonstrate good communication skills, dynamic leadership qualities with concern for environmental protection.
PEO4	Computer Science and Engineering graduates will be capable of pursuing higher studies, take up research and development work blended with ethics and human values.
PEO5	Computer Science and Engineering graduates will have the ability to become entrepreneurs there by switching over from responsive engineer to creative engineer.

# **Program Outcomes (POs)**

PO1	<b>Engineering Knowledge:</b> Apply knowledge of mathematics and science, with fundamentals of Computer Science and Engineering to be able to solve complex engineering problems related to CSE.
PO2	<b>Problem Analysis:</b> Identify, Formulate, review research literature and analyze complex engineering problems related to CSE and reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences.
PO3	<b>Design/ Development of solutions:</b> Design solutions for complex engineering problems related to CSE and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety and the cultural societal and environmental considerations.
PO4	<b>Conduct Investigations of Complex problems:</b> Use research–based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
PO5	<b>Modern Tool Usage:</b> Create, select and apply appropriate techniques, resources and modern engineering and IT tools including prediction and modeling to computer science related complex engineering activities with an understanding of the limitations.

62

PO6	<b>The Engineer and Society:</b> Apply Reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the CSE professional engineering practice.
PO7	<b>Environment and Sustainability:</b> Understand the impact of the CSE professional engineering solutions in societal and environmental contexts and demonstrate the knowledge of, and need for sustainable development.
PO8	<b>Ethics:</b> Apply Ethical Principles and commit to professional ethics and responsibilities and norms of the engineering practice.
PO9	Individual and Team Work: Function effectively as an individual and as a member or leader in diverse teams and in multidisciplinary Settings.
PO10	<b>Communication:</b> Communicate effectively on complex engineering activities with the engineering community and with society at large such as able to comprehend and with write effective reports and design documentation, make effective presentations and give and receive clear instructions.
PO11	<b>Project Management and Finance:</b> Demonstrate knowledge and to one's own work, as a member and leader in a team, to manage projects and in multi disciplinary environments.
PO12	<b>Life-Long Learning:</b> Recognize the need for and have the preparation and ability to engage in independent and life-long learning the broadest context of technological change.

# Program Specific Outcome (PSOs)

PSO1	<b>Professional Skills:</b> The ability to understand, analyze and develop computer programs in the areas related to system software, multimedia, web design, big data analytics, and networking for efficient design of computer-based systems of varying complexity.
PSO2	<b>Problem - Solving Skills:</b> The ability to apply standard practices and strategies in software project development using open-ended programming environments to deliver a quality product for business success.
PSO3	<b>Mathematical concepts:</b> Ability to apply mathematical concepts to solve real world problems using appropriate data structure and suitable algorithms.

#### VISION

Excellence in creating globally competent professionals and moulding them as leaders in Computer Science & Engineering education and research.

#### MISSION

**M1:** Maintaining excellence in Computer Science & Engineering education through academic professionalism, teaching, curricula which reflect the changing needs of the society.

**M2:** Establishing centre of excellence by creating knowledge through research and industrial exposure in the area of Computer Science & Engineering.

**M3:** Developing communication skill, leadership qualities, team work & skills for continuing education among the students.

**M4:** Inculcating ethics, human values and skills for solving societal problems and environmental protection.

**M5:** Validate engineering knowledge through innovative research projects to enhance their employability and entrepreneurship skills.

# **III to VIII Semesters**

Outcome Based Education (OBE) / Choice Based Credit System (CBCS) Curricula

With effect from Academic Year

# 2018 - 19

# **Program Educational Objectives (PEOs)**

The graduates of Computer Science and Engineering are expected to fulfill the following PEOs after a few years of their graduation.

PEO1	Graduates in Computer Science and Engineering will apply the technical knowledge of analysis and design of software used for sustainable societal growth.
PEO2	Graduates of Computer Science and Engineering will demonstrate logical thinking and programming skills.
PEO3	Graduates in Computer Science and Engineering will demonstrate good communication skills, dynamic leadership qualities with concern for environmental protection.
PEO4	Computer Science and Engineering graduates will be capable of pursuing higher studies, take up research and development work blended with ethics and human values.
PEO5	Computer Science and Engineering graduates will have the ability to become entrepreneurs there by switching over from responsive engineer to creative engineer.

# **Program Outcomes (POs)**

PO1	<b>Engineering Knowledge:</b> Apply knowledge of mathematics and science, with fundamentals of Computer Science and Engineering to be able to solve complex engineering problems related to CSE.
PO2	<b>Problem Analysis:</b> Identify, Formulate, review research literature and analyze complex engineering problems related to CSE and reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences.
PO3	<b>Design/ Development of solutions:</b> Design solutions for complex engineering problems related to CSE and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety and the cultural societal and environmental considerations.
PO4	<b>Conduct Investigations of Complex problems:</b> Use research–based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
PO5	<b>Modern Tool Usage:</b> Create, select and apply appropriate techniques, resources and modern engineering and IT tools including prediction and modeling to computer science related complex engineering activities with an understanding of the limitations.

PO6	<b>The Engineer and Society:</b> Apply Reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the CSE professional engineering practice.
PO7	<b>Environment and Sustainability:</b> Understand the impact of the CSE professional engineering solutions in societal and environmental contexts and demonstrate the knowledge of, and need for sustainable development.
PO8	<b>Ethics:</b> Apply Ethical Principles and commit to professional ethics and responsibilities and norms of the engineering practice.
PO9	Individual and Team Work: Function effectively as an individual and as a member or leader in diverse teams and in multidisciplinary Settings.
PO10	<b>Communication:</b> Communicate effectively on complex engineering activities with the engineering community and with society at large such as able to comprehend and with write effective reports and design documentation, make effective presentations and give and receive clear instructions.
PO11	<b>Project Management and Finance:</b> Demonstrate knowledge and to one's own work, as a member and leader in a team, to manage projects and in multi disciplinary environments.
PO12	<b>Life-Long Learning:</b> Recognize the need for and have the preparation and ability to engage in independent and life-long learning the broadest context of technological change.

# Program Specific Outcome (PSOs)

PSO1	<b>Professional Skills:</b> The ability to understand, analyze and develop computer programs in the areas related to system software, multimedia, web design, big data analytics, and networking for efficient design of computer-based systems of varying complexity.
PSO2	<b>Problem - Solving Skills:</b> The ability to apply standard practices and strategies in software project development using open-ended programming environments to deliver a quality product for business success.
PSO3	<b>Mathematical concepts:</b> Ability to apply mathematical concepts to solve real world problems using appropriate data structure and suitable algorithms.

# DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

### VISION

Excellence in creating globally competent professionals and moulding them as leaders in Computer Science & Engineering education and research.

### MISSION

**M1:** Maintaining excellence in Computer Science & Engineering education through academic professionalism, teaching, curricula which reflect the changing needs of the society.

**M2:** Establishing centre of excellence by creating knowledge through research and industrial exposure in the area of Computer Science & Engineering.

**M3:** Developing communication skill, leadership qualities, team work & skills for continuing education among the students.

**M4:** Inculcating ethics, human values and skills for solving societal problems and environmental protection.

**M5:** Validate engineering knowledge through innovative research projects to enhance their employability and entrepreneurship skills.

## **III to VIII Semesters**

Outcome Based Education (OBE) / Choice Based Credit System (CBCS) Curricula

### With effect from Academic Year

## 2016 - 17

## **Program Educational Objectives (PEOs)**

The graduates of Computer Science and Engineering are expected to fulfill the following PEOs after a few years of their graduation.

PEO1	Graduates in Computer Science and Engineering will apply the technical knowledge of analysis and design of software used for sustainable societal growth.
PEO2	Graduates of Computer Science and Engineering will demonstrate logical thinking and programming skills.
PEO3	Graduates in Computer Science and Engineering will demonstrate good communication skills, dynamic leadership qualities with concern for environmental protection.
PEO4	Computer Science and Engineering graduates will be capable of pursuing higher studies, take up research and development work blended with ethics and human values.
PEO5	Computer Science and Engineering graduates will have the ability to become entrepreneurs there by switching over from responsive engineer to creative engineer.

## **Program Outcomes (POs)**

PO1	<b>Engineering Knowledge:</b> Apply knowledge of mathematics and science, with fundamentals of Computer Science and Engineering to be able to solve complex engineering problems related to CSE.				
PO2	<b>Problem Analysis:</b> Identify, Formulate, review research literature and analyze complex engineering problems related to CSE and reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences.				
PO3	<b>Design/ Development of solutions:</b> Design solutions for complex engineering problems related to CSE and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety and the cultural societal and environmental considerations.				
PO4	<b>Conduct Investigations of Complex problems:</b> Use research–based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.				
PO5	<b>Modern Tool Usage:</b> Create, select and apply appropriate techniques, resources and modern engineering and IT tools including prediction and modeling to computer science related complex engineering activities with an understanding of the limitations.				

62

PO6	<b>The Engineer and Society:</b> Apply Reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the CSE professional engineering practice.				
PO7	<ul> <li>Environment and Sustainability: Understand the impact of the CSE professional engineering solutions in societal and environmental contexts and demonstrate the knowledge of, and need for sustainable development.</li> </ul>				
PO8	<b>Ethics:</b> Apply Ethical Principles and commit to professional ethics and responsibilities and norms of the engineering practice.				
PO9	<b>Individual and Team Work:</b> Function effectively as an individual and as a member or leader in diverse teams and in multidisciplinary Settings.				
PO10	<b>Communication:</b> Communicate effectively on complex engineering activities with the engineering community and with society at large such as able to comprehend and with write effective reports and design documentation, make effective presentations and give and receive clear instructions.				
Project Management and Finance: Demonstrate knowledge and to own work, as a member and leader in a team, to manage projects multi disciplinary environments.					
PO12	<b>Life-Long Learning:</b> Recognize the need for and have the preparation and ability to engage in independent and life-long learning the broadest context of technological change.				

## Program Specific Outcome (PSOs)

PSO1	<b>Professional Skills:</b> The ability to understand, analyze and develop computer programs in the areas related to system software, multimedia, web design, big data analytics, and networking for				
	efficient design of computer-based systems of varying complexity.				
PSO2	Problem - Solving Skills: The ability to apply standard practices and				
PSO3	<b>Mathematical concepts:</b> Ability to apply mathematical concepts to solve real world problems using appropriate data structure and suitable algorithms.

Syllabus – III to VIII Semester B.E

# NAGARJUNA COLLEGE OF ENGINEERING & TECHNOLOGY

# An Autonomous College under VTU

Outcome Based Education (OBE)/ Choice Based Credit System (CBCS) Curricula

With effect from Academic Year 2020-21

# DEPARTMENT OF CIVILENGINEERING

Department of Civil Engineering NAGARJUNA COLLEGE OF ENGINEERING & TECHNOLOGY Mudugurki Village, VenkatagiriKote Post, Devanaballi taluk, Bangalore district - 562 164

HOD Civil Engineering Nagarjuna College of Engineering & Technology Mudugerid Villam, Venkatepirikote-Post Devanahala Ticok, Sebgebru 562 164

Nagarjuna College of Engineering & Technology

Devanaballi (To) Bennelum (Dr LDim schuck

# Program Educational Objectives (PEOs)

- PE01: Graduates in Civil Engineering will apply the technical knowledge for sustainable societal growth.
- PEO2: Graduates of civil Engineering will demonstrate designing, modeling and analyzing skills,
- PEO3: Graduates in Civil Engineering will demonstrate good communication skills, dynamic leadership qualities with concern for environmental protection.
- PE04: Civil Engineering graduates will be capable of pursuing higher studies, take up research and development work blended with ethics and human values.
- PE05: Civil engineering graduates will have the ability to become entrepreneurs thereby switching over from responsive engineering to creative engineering.

# Program Outcomes (POs)

- PO-1: Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals and Civil Engineering principles to the solution of complex problems in Civil Engineering.
- PO-2: Problem Analysis: Identify, formulate, research literature and analyze complex Civil Engineering problems reaching substantiated conclusions using first principles of mathematics and engineering sciences.
- PO-3: Design/Development of Solutions: Design solutions for complex Civil Engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, cultural, societal and environmental considerations.
- PO-4: Conduct Investigations of Complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions related to Civil Engineering problems.
- PO-5: Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering tools such as CAD, FEM, GIS, etc. including prediction and modeling to complex Civil Engineering activities with an understanding of the limitations.
- PO-6: The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional Civil Engineering practice.

- PO-7: Environment and Sustainability: Understand the impact of the professional Civil Engineering solutions in societal and environmental contexts and demonstrate the knowledge and the need for sustainable development.
- PO-8: Ethics: Apply ethical principles and commit to professional ethics and responsibilities while following the Civil Engineering practice.
- PO-9: Individual and Team work: Function effectively as an individual and as a member or leader in diverse teams and in multidisciplinary settings.
- PO-10: Communication: Communicate effectively on complex Civil Engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- PO-11: Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage Civil Engineering projects and in multidisciplinary environments.
- PO-12: Life Long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

# Program Specific Outcome (PSO)

- PSO1: To carryout surveying, prepare layout plans, maps for structures and alignments for canals and roads.
- PSO2: To specify, analyze, design, estimate and supervise construction activities such as, test and evaluate foundations and superstructures for buildings, industries, irrigation and hydraulic structures, highways, railways, airports, docks and harbors,
- PS03: To understand the impact of water, air and noise pollution; the methods of waste collection, disposal and processing; specify, design and analyze water supply system, sewerage and industrial effluent conveying and treatment systems.

With effect from Academic Year 2019-20

# DEPARTMENT OF CIVIL ENGINEERING

#### VISION

To transform the students as leaders in Civil Engineering to achieve professional excellence in the challenging future.

#### MISSION

M1: To provide the Civil Engineering knowledge and skills for students through an excellent academic environment.

M2: Adopting Innovative teaching techniquesusing modern engineering tools for designing, modeling and analyzing the societal and environmental problems.

M3: Developing Communication skill, leadership qualities through tearnwork andskills for continuing education among the students.

M4: To inculcate moral, ethical and professional values among students to serve the society.

M5: Validate engineering knowledge through innovative research projects to enhance theiremployability and entrepreneurship skills.

010106

HOD Civil Engineering Nagarjuna College of Engineering & Technology Mudagurki Villaga, Venkatspirikote-Post Devanahalii Taluk, Bengaturu -662, 164

# Program Educational Objectives (PEOs)

 PEO1: Graduates in Civil Engineering will apply the technical knowledge for sustainable societal growth.

PEO2: Graduates of civil Engineering will demonstrate designing, modeling and analyzing skills.

 PEO3: Graduates in Civil Engineering will demonstrate good communication skills, dynamic leadership qualities with concern forenvironmental protection.

 PEO4: Civil Engineering graduates will becapable of pursuing higher studies, take up research and development work blended with ethics and human values.

 PEO5: Civil engineering graduates will have the ability to become entrepreneurs thereby switching over from responsive engineering to creative engineering.

## Program Outcomes (POs)

 PO-1: Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals and Civil Engineering principles to the solution of complex problems in Civil Engineering.

 PO-2: Problem Analysis: Identify, formulate, research literature and analyze complex Civil Engineering problems reaching substantiated conclusions using first principles of mathematics and engineering sciences.

 PO-3: Design/Development of Solutions: Design solutions for complex Civil Engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, cultural, societal and environmental considerations.

 PO-4: Conduct Investigations of Complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions related to Civil Engineering problems.

 PO-5: Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering tools such as CAD, FEM, GIS, etc. including prediction and modeling to complex Civil Engineering activities with an understanding of the limitations.

 PO-6: The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professionalCivil Engineering practice.

 PO-7: Environment and Sustainability: Understand the impact of the professional Civil Engineering solutions in societal and environmental contexts and demonstrate the knowledge and the need forsustainable development.

 PO-8: Ethics: Apply ethical principles and commit to professional ethics and responsibilities while following the Civil Engineering practice.

 PO-9: Individual and Team work: Function effectively as an Individual and as a member or leader in diverse teams and in multidisciplinary settings.

 PO-10: Communication: Communicate effectively on complex Civil Engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and

receive clear instructions.

 PO-11: Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these toone's own work, as a member and leader in a team, to manage Civil Engineering projectsand in multidisciplinary environments.

 PO-12: Life Long Learning: Recognize theneed for, and have the preparation and ability to engage in independent and lifelonglearning in the broadest context of technological change.

## Program Specific Outcome (PSO)

 PSO-1: Apply the knowledge of Civil Engineering in Sustainable Infrastructure developments.

 PSO-2: Identify, analyze and manage Civil Engineering problems with ethical and social responsibilities.

 PSO-3: Implementation of relevant codes/ specifications/ guidelines to arrive at comprehensive solutions to address societal needs and exhibit communication and teamwork skills.

# DEPARTMENT OF CIVIL ENGINEERING

#### VISION

To transform the students as leaders in CivilEngineering to achieve professional excellence in the challenging future.

#### MISSION

MI: To provide the Civil Engineering knowledge and skills for students through an excellent academic environment.

M2: Adopting innovative teaching techniques using modern engineering tools for designing, modeling and analyzing the societal and environmental problems. M3: Developing Communication skill, leadership qualities through teamwork and skills for continuing education among the students.

M4: To inculcate moral, ethical and professional values among students to serve the society.

M5: Validate engineering knowledge through innovative research projects to enhance their employability and entropreneurship skills.

HOD Civil Engineering Nagarjuna College of Engineering & Technology Mudugurid Villege, Venkabgiri/2015-Post Devanahalli Taluk, Bongaluru -562, 164

### Program Educational Objectives (PEOs)

LEGYN E

50

 PEO1: Graduates in Civil Engineering will apply the technical knowledge for sustainable societal growth.

 PEO2: Graduates of civil Engineering will demonstrate designing, modeling and analyzing skills.

 PEO3: Graduates in Civil Engineering will demonstrate good communication skills, dynamic leadership qualities with concern for environmental protection.

 PEO4: Civil Engineering graduates will becapable of pursuing higher studies, take up research and development work blended with ethics and human values.

 PEO5: Civil engineering graduates will have the ability to become entrepreneurs thereby switching over from responsive engineering to creative engineering.

#### Program Outcomes (POs)

 PO-1: Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals and Civil Engineering principles to the solution of complex problems in Civil Engineering.

 PO-2: Problem Analysis: Identify, formulate, research literature and analyze complex Civil Engineering problems reaching substantiated conclusions using first principles of mathematics and engineering sciences.

 PO-3: Design/Development of Solutions: Design solutions for complex Civil Engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, cultural, societal and

environmentalconsiderations.

11-13 2.09

32

35

1

 PO-4: Conduct Investigations of Complex problems: Use researchbased knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions related to Civil Engineering problems.

 PO-5: Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering tools such as CAD, FEM, GIS, etc. including prediction and modeling to complex Civil Engineering activities with an understanding of the limitations.

 PO-6: The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professionalCivil Engineering practice.

24.6

27

 PO-7: Environment and Sustainability: Understand the impact of the professional Civil Engineering solutions in societal and environmental contexts and demonstrate the knowledge and the need forsustainable development.

 PO-8: Ethics: Apply ethical principles and commit to professional ethics and responsibilities while following the Civil Engineering practice;

 PO-9: Individual and Team work: Function effectively as an individual and as a member or leader in diverse teams and in multidisciplinary settings.

 PO-10: Communication: Communicate effectively on complex Civil Engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

 PO-11: Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage Civil Engineering projects and in multidisciplinary environments.

 PO-12: Life Long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

2

13

15

### Program Specific Outcome (PSO)

• PSO-1: Apply the knowledge of Civil Engineering in Sustainable Infrastructure developments.

• PSO-2: Identify, analyze and manage Civil Engineering problems with ethical and social responsibilities.

 PSO-3: Implementation of relevant codes/ specifications/ guidelines to arrive at comprehensive solutions to address societal needs and exhibit communication and teamwork skills.

### VISION

To transform the students as leaders in Electronics & Communication Engineering to achieve professional excellence in the challenging future

## MISSION

- M1: To create an environment for the students to have strong academic fundamentals and enable them to be life-long learners.
- M2: To provide modern tools to the students in the field of electronics and communication to meet the real-world challenges.
- M3: To develop Communication skill, leadership qualities, team work and skills for continuing education among the students.
- M4: To inculcate Ethics, Human values and skills for solving societal problems and environmental protection.
- M5: Validate engineering knowledge through innovative research projects to enhance their employability and entrepreneurship skills.

# **III to VIII Semesters**

Outcome Based Education(OBE)/ Choice Based Credit System(CBCS) Curricula With effect from Academic Year 2020-21

### **Program Educational Objectives (PEOs)**

**PEO-1**: Graduates of Electronics and Communication engineering will be using the basic academic knowledge of design and analysis required in the industry for sustainable societal growth.

**PEO-2**: Graduates of Electronics and Communication engineering will be able to design project based learning and team based learning.

**PEO-3**: Graduates in Electronics and Communication engineering will demonstrate good communication skills, dynamic leadership qualities with concern for environmental protection.

**PEO-4**: Electronics and Communication engineering graduates will be capable of pursuing higher studies, take up research and development work blended with ethics and human values.

**PEO-5**: Electronics and Communication engineering graduates will have the ability to get employed and become entrepreneurs thereby switching over from responsive engineering to creative engineering.

# **Program Outcomes and Program Specific Outcomes as defined by the Program**

### **Program Outcome:**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and electronics and communication engineering principles to the solution of complex problems in electronics and communication engineering.

**PO2:** Problem Analysis: Identify, formulate, research literature, and analyze complex electronics and communication engineering problems reaching substantiated conclusions using first principles of mathematics, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex electronics and communication engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions related to electronics and communication engineering problems.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex electronics and communication engineering activities with an understanding of the limitations.

**PO6:** The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities

relevant to the professional electronics and communication engineering practice.

**PO7:** Environment and Sustainability: Understand the impact of the professional electronics and communication engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the electronics and communication engineering practice.

**PO9:** Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex electronics and communication engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO11:** Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12:** Life Long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

#### **Program Specific Outcome (PSO):**

**PSO1.**Graduate will be able to identify, analyze& solve the problems related to Electronics and Communication Engineering by applying the fundamental knowledge of Electronics and Communication.

**PSO2.**Graduate will demonstrate an ability to investigate, design and develop both software and hardware using significant knowledge of modern tools in Electronics and Communication Engineering.

**PSO3.**Graduate will be able to apply their knowledge to assess societal, environmental, health, safety issues with professional ethics and can also pursue higher studies, involve in research activities, be employable or entrepreneur.

# DEPARTMENT OF ELECTRONICS & COMMUNICATION ENGINEERING

# VISION

To transform the students as leaders in Electronics & Communication Engineering to achieve professional excellence in the challenging future

# MISSION

- M1: To create an environment for the students to have strong academic fundamentals and enable them to be life-long learners.
- M2: To provide modern tools to the students in the field of electronics and communication to meet the real-world challenges.
- M3: To develop Communication skill, leadership qualities, team work and skills for continuing education among the students.
- M4: To inculcate Ethics, Human values and skills for solving societal problems and environmental protection.
- M5: Validate engineering knowledge through innovative research projects to enhance their employability and entrepreneurship skills.

# **III to VIII Semesters**

Outcome Based Education(OBE)/ Choice Based Credit System(CBCS) Curricula

With effect from Academic Year 2019-20

# **Program Educational Objectives (PEOs)**

**PEO-1**: Graduates of Electronics and Communication engineering will be using the basic academic knowledge of design and analysis required in the industry for sustainable societal growth.

**PEO-2**: Graduates of Electronics and Communication engineering will be able to design project based learning and team based learning.

**PEO-3**: Graduates in Electronics and Communication engineering will demonstrate good communication skills, dynamic leadership qualities with concern for environmental protection.

**PEO-4**: Electronics and Communication engineering graduates will be capable of pursuing higher studies, take up research and development work blended with ethics and human values.

**PEO-5**: Electronics and Communication engineering graduates will have the ability to get employed and become entrepreneurs thereby switching over from responsive engineering to creative engineering.

# **Program Outcomes and Program Specific Outcomes as defined by the Program**

#### **Program Outcome:**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and electronics and communication engineering principles to the solution of complex problems in electronics and communication engineering.

**PO2:** Problem Analysis: Identify, formulate, research literature, and analyze complex electronics and communication engineering problems reaching substantiated conclusions using first principles of mathematics, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex electronics and communication engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions related to electronics and communication engineering problems.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex electronics and communication engineering activities with an understanding of the limitations.

**PO6:** The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities

relevant to the professional electronics and communication engineering practice.

**PO7:** Environment and Sustainability: Understand the impact of the professional electronics and communication engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the electronics and communication engineering practice.

**PO9:** Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex electronics and communication engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO11:** Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12:** Life Long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

#### **Program Specific Outcome (PSO):**

**PSO1.**Graduate will be able to identify, analyze& solve the problems related to Electronics and Communication Engineering by applying the fundamental knowledge of Electronics and Communication.

**PSO2.**Graduate will demonstrate an ability to investigate, design and develop both software and hardware using significant knowledge of modern tools in Electronics and Communication Engineering.

**PSO3.**Graduate will be able to apply their knowledge to assess societal, environmental, health, safety issues with professional ethics and can also pursue higher studies, involve in research activities, be employable or entrepreneur.

**PO6:** The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities

relevant to the professional electronics and communication engineering practice.

**PO7:** Environment and Sustainability: Understand the impact of the professional electronics and communication engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the electronics and communication engineering practice.

**PO9:** Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex electronics and communication engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO11:** Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12:** Life Long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

#### **Program Specific Outcome (PSO):**

**PSO1.**Graduate will be able to identify, analyze& solve the problems related to Electronics and Communication Engineering by applying the fundamental knowledge of Electronics and Communication.

**PSO2.**Graduate will demonstrate an ability to investigate, design and develop both software and hardware using significant knowledge of modern tools in Electronics and Communication Engineering.

**PSO3.**Graduate will be able to apply their knowledge to assess societal, environmental, health, safety issues with professional ethics and can also pursue higher studies, involve in research activities, be employable or entrepreneur.

# DEPARTMENT OF ELECTRONICS & COMMUNICATION ENGINEERING

# VISION

To transform the students as leaders in Electronics & Communication Engineering to achieve professional excellence in the challenging future

# MISSION

- M1: To create an environment for the students to have strong academic fundamentals and enable them to be life-long learners.
- M2: To provide modern tools to the students in the field of electronics and communication to meet the real-world challenges.
- M3: To develop Communication skill, leadership qualities, team work and skills for continuing education among the students.
- M4: To inculcate Ethics, Human values and skills for solving societal problems and environmental protection.
- M5: Validate engineering knowledge through innovative research projects to enhance their employability and entrepreneurship skills.

# III to VIII Semesters

Outcome Based Education(OBE)/ Choice Based Credit System(CBCS) Curricula With effect from Academic Year 2017-18

# **Program Educational Objectives (PEOs)**

**PEO-1:** Graduates of Electronics and Communication engineering will be using the basic academic knowledge of design and analysis required in the industry for sustainable societal growth.

**PEO-2:** Graduates of Electronics and Communication engineering will be able to design project based learning and team based learning.

**PEO-3**: Graduates in Electronics and Communication engineering will demonstrate good communication skills, dynamic leadership qualities with concern for environmental protection.

**PEO-4**: Electronics and Communication engineering graduates will be capable of pursuing higher studies, take up research and development work blended with ethics and human values.

**PEO-5**: Electronics and Communication engineering graduates will have the ability to get employed and become entrepreneurs thereby switching over from responsive engineering to creative engineering.

# **Program Outcomes and Program Specific Outcomes as defined by the Program**

#### **Program Outcome:**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and electronics and communication engineering principles to the solution of complex problems in electronics and communication engineering.

**PO2:** Problem Analysis: Identify, formulate, research literature, and analyze complex electronics and communication engineering problems reaching substantiated conclusions using first principles of mathematics, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex electronics and communication engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions related to electronics and communication engineering problems.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex electronics and communication engineering activities with an understanding of the limitations.

**PO6:** The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities

relevant to the professional electronics and communication engineering practice.

**PO7:** Environment and Sustainability: Understand the impact of the professional electronics and communication engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the electronics and communication engineering practice.

**PO9:** Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex electronics and communication engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO11:** Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12:** Life Long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

#### **Program Specific Outcome (PSO):**

**PSO1.**Graduate will be able to identify, analyze& solve the problems related to Electronics and Communication Engineering by applying the fundamental knowledge of Electronics and Communication.

**PSO2.**Graduate will demonstrate an ability to investigate, design and develop both software and hardware using significant knowledge of modern tools in Electronics and Communication Engineering.

**PSO3.**Graduate will be able to apply their knowledge to assess societal, environmental, health, safety issues with professional ethics and can also pursue higher studies, involve in research activities, be employable or entrepreneur.

With effect from Academic Year 2016-17

# **Program Educational Objectives (PEOs)**

**PEO-1:** Graduates of Electronics and Communication engineering will be using the basic academic knowledge of design and analysis required in the industry for sustainable societal growth.

**PEO-2**: Graduates of Electronics and Communication engineering will be able to design project based learning and team based learning.

**PEO-3**: Graduates in Electronics and Communication engineering will demonstrate good communication skills, dynamic leadership qualities with concern for environmental protection.

**PEO-4**: Electronics and Communication engineering graduates will be capable of pursuing higher studies, take up research and development work blended with ethics and human values.

**PEO-5**: Electronics and Communication engineering graduates will have the ability to get employed and become entrepreneurs thereby switching over from responsive engineering to creative engineering.

# **Program Outcomes and Program Specific Outcomes as defined by the Program**

# **Program Outcome:**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and electronics and communication engineering principles to the solution of complex problems in electronics and communication engineering.

**PO2:** Problem Analysis: Identify, formulate, research literature, and analyze complex electronics and communication engineering problems reaching substantiated conclusions using first principles of mathematics, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex electronics and communication engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions related to electronics and communication engineering problems.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex electronics and communication engineering activities with an understanding of the limitations.

**PO6:** The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities

relevant to the professional electronics and communication engineering practice.

**PO7:** Environment and Sustainability: Understand the impact of the professional electronics and communication engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the electronics and communication engineering practice.

**PO9:** Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex electronics and communication engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO11:** Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12:** Life Long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

#### **Program Specific Outcome (PSO):**

**PSO1.**Graduate will be able to identify, analyze& solve the problems related to Electronics and Communication Engineering by applying the fundamental knowledge of Electronics and Communication.

**PSO2.**Graduate will demonstrate an ability to investigate, design and develop both software and hardware using significant knowledge of modern tools in Electronics and Communication Engineering.

**PSO3.**Graduate will be able to apply their knowledge to assess societal, environmental, health, safety issues with professional ethics and can also pursue higher studies, involve in research activities, be employable or entrepreneur.

Nagarjuna Collége of Engineering & Technology Devanahalli (Tq) Bengaluru (Dt.)-Pin: 562164

An Autonomous College under VTU

# DEPARTMENT OF INFORMATION SCIENCE & ENGINEERING

# **III to VIII Semester**

Scheme and Syllabus

# VISION

To disseminate the IT knowledge among the students for achieving excellence in education and to irradiate budding engineers as leaders in information technology.

# MISSION

- M1: To maintain leadership and excellence in Information Technology.
- M2: Achieving excellence in IT through analysis, design, development of software products
- M3: Developing communication skills, leadership qualities and team work among students community by providing opportunities to work on various projects through internship with industry partners
- M4: To inculcate Ethics and Human values for solving societal problems and environmental protection.
- M5: Promoting research, higher studies and entrepreneurship among the students through outside world interaction

# With Effect from Academic Year 2020-21

# PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

The graduates of Information Science and Engineering are expected to fulfill the following PEOs after a few years of their graduation.

**PEO1:** Pursue a successful career in the field of Information Science & Engineering or a related field utilizing his/her education and contribute to the profession as an excellent employee, or as an entrepreneur.

**PEO2:** Be able to work effectively in multidisciplinary environments and be responsible members/leaders of their communities

**PEO3:** The graduates of Information Science and Engineering Program should be able to establish an understanding of professionalism, teamwork, ethics, public policy that allows them to become good professional Engineers

**PEO4:** The graduates of Information Science and Engineering Program should be able to provide novel engineering solutions and efficient software designs with legal and ethical responsibility.

**PEO5:** Continuously improve by pursuing advanced degrees in engineering, business, or other professional fields through formal means or through informal self-study.

# **PROGRAM OUTCOMES (POs):**

Graduates of the Information Science and Engineering Programme will be able to achieve the following POs:

# **PO1: Engineering Knowledge:**

Apply the knowledge of mathematics, science, engineering fundamentals, and **Information** Science and Engineering principles to the solution of complex problems in **Information** Science and Engineering.

# **PO2: Problem Analysis:**

Identify, formulate, research literature, and analyze complex **Information Science and Engineering** problems reaching substantiated conclusions using first principles of mathematics and engineering sciences.

# **PO3: Design/Development of Solutions:**

Design solutions for complex **Information Science and Engineering** problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

# **PO4:** Conduct investigations of Complex problems:

Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions related to **Information Science and Engineering** problems.

# **PO5: Modern Tool Usage:**

Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex **Information Science and Engineering** activities with an understanding of the limitations.

# **PO6: The Engineer and Society:**

Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional **Information Science and Engineering** practice.

# **PO7: Environment and Sustainability:**

Understand the impact of the professional **Information Science and Engineering** solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

#### **PO8: Ethics:**

Apply ethical principles and commit to professional ethics and responsibilities and norms of the **Information Science and Engineering** practice.

# **PO9: Individual and Team work:**

Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

# **PO10:** Communication:

Communicate effectively on complex **Information Science and Engineering** activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

# **PO11: Project Management and Finance:**

Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage **Information Science and Engineering** projects and in multidisciplinary environments.

#### **PO12: Life Long Learning:**

Recognize the need for, and have the preparation and ability to engage in independent and lifelong learning in the broadest context of technological change.

# **PROGRAM SPECIFIC OUTCOMES (PSOs):**

Program Specific Outcomes (PSOs) are what the graduates of a specific undergraduate engineering program should be able to do at the time of graduation.

#### **PSO1: Professional Skills:**

The ability to understand, analyze and develop algorithms and write Information application programs in the areas related to information technology

#### **PSO2: Problem-Solving Skills:**

Ability to understand the ethics, human values for solving societal problems and environmental protection

#### **PSO3:** Foundation of mathematical concepts:

Ability to understand the software development skills and practical knowledge for promoting research, higher studies and entrepreneurship.

Mudugurki Village, VenkatagiriKote Post, Devanahalli taluk, Bangalore district - 562 164

# NAGARJUNA COLLEGE OF ENGINEERING & TECHNOLOGY

# An Autonomous College under VTU

# DEPARTMENT OF INFORMATION SCIENCE & ENGINEERING

# VISION

To disseminate the IT knowledge among the students for achieving excellence in education and to irradiate budding engineers as leaders in information technology

# MISSION

- M1. To maintain leadership and excellence in Information Technology.
- M2. Achieving excellence in IT through analysis, design, development of software products.
- M3. Developing communication skills, leadership qualities and team work among students community by providing opportunities to work on various projects through internship with industry partners.
- M4. To inculcate Ethics and Human values for solving societal problems and environmental protection.
- M5. Promoting research, higher studies and entrepreneurship among the students through outside world interaction.

# NAGARJUNA COLLEGE OF ENGINEERING & TECHNOLOGY

#### An Autonomous College under VTU

## DEPARTMENT OF INFORMATION SCIENCE & ENGINEERING

#### VISION

Excellence in creating globally competent professionals and moulding them as leaders in Computer Science & Engineering education and research.

### MISSION

- M1: Maintaining excellence in Computer Science & Engineering education through academic professionalism, teaching, curricula which reflect the changing needs of the society.
- M2: Establishing centre of excellence by creating knowledge through research and industrial exposure in the area of Computer Science & Engineering.
- M3: Developing communication skill, leadership qualities, team work & skills for continuing education among the students.
- M4: Inculcating ethics, human values and skills for solving societal problems and environmental protection.
- M5: Validate engineering knowledge through innovative research projects to enhance their employability and entrepreneurship skills.

## III & IV Semesters

Scheme and Syllabus

#### **PROGRAM EDUCATIONAL OBJECTIVES (PEOs)**

The graduates of Information Science and Engineering are expected to fulfill the following PEOs after a few years of their graduation.

**PEO1:** Pursue a successful career in the field of Information Science & Engineering or a related field utilizing his/her education and contribute to the profession as an excellent employee, or as an entrepreneur.

**PEO2:** Be able to work effectively in multidisciplinary environments and be responsible members/leaders of their communities

**PEO3:** The graduates of Information Science and Engineering Program should be able to establish an understanding of professionalism, teamwork, ethics, public policy that allows them to become good professional Engineers

**PEO4:** The graduates of Information Science and Engineering Program should be able to provide novel engineering solutions and efficient software designs with legal and ethical responsibility.

**PEO5:** Continuously improve by pursuing advanced degrees in engineering, business, or other professional fields through formal means or through informal self-study.

## **PROGRAM OUTCOMES (POs):**

Graduates of the Information Science and Engineering Programme will be able to achieve the following POs:

## **PO1: Engineering Knowledge:**

Apply the knowledge of mathematics, science, engineering fundamentals, and **Information Science and Engineering** principles to the solution of complex problems in **Information Science and Engineering**.

## **PO2: Problem Analysis:**

Identify, formulate, research literature, and analyze complex **Information Science and Engineering** problems reaching substantiated conclusions using first principles of mathematics and engineering sciences.

## **PO3: Design/Development of Solutions:**

Design solutions for complex **Information Science and Engineering** problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental cons**254** tions.

#### PO4: Conduct investigations of Complex problems:

Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions related to **Information Science and Engineering** problems.

## PO5: Modern Tool Usage:

Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex **Information Science and Engineering** activities with an understanding of the limitations.

## PO6: The Engineer and Society:

Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional **Information Science and Engineering** practice.

## PO7: Environment and Sustainability:

Understand the impact of the professional **Information Science and Engineering** solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

### PO8: Ethics:

Apply ethical principles and commit to professional ethics and responsibilities and norms of the **Information Science and Engineering** practice.

### PO9: Individual and Team work:

Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

### **PO10: Communication:**

Communicate effectively on complex **Information Science and Engineering** activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

## PO11: Project Management and Finance:

#### 255

Demonstrate knowledge and understanding of the engineering and

management principles and apply these to one's own work, as a member and leader in a team, to manage **Information Science and Engineering** projects and in multidisciplinary environments.

### **PO12: Life Long Learning:**

Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## **PROGRAM SPECIFIC OUTCOMES (PSOs):**

Program Specific Outcomes (PSOs) are what the graduates of a specific undergraduate engineering program should be able to do at the time of graduation.

#### **PSO1: Professional Skills:**

The ability to understand, analyze and develop algorithms and write Information application programs in the areas related to information technology

#### **PSO2:** Problem-Solving Skills:

Ability to understand the ethics, human values for solving societal problems and environmental protection

#### **PSO3:** Foundation of mathematical concepts:

Ability to understand the software development skills and practical knowledge for promoting research, higher studies and entrepreneurship.

VISION

Leadership and Excellence in Education.

## MISSION

To fulfill the vision by imparting total quality education replete with the philosophy of blending human values and academic professionalism.

## DEPARTMENT OF INFORMATION SCIENCE & ENGINEERING

III & IV Semesters

# Scheme and Syllabus with effect from Academic Year 2017 - 18

### **PROGRAM EDUCATIONAL OBJECTIVES (PEOs)**

The graduates of Information Science and Engineering are expected to fulfill the following PEOs after a few years of their graduation.

- **PEO1:** Pursue a successful career in the field of Information Science & Engineering or a related field utilizing his/her education and contribute to the profession as an excellent employee, or as an entrepreneur.
- **PEO2:** Be able to work effectively in multidisciplinary environments and be responsible members/leaders of their communities
- **PEO3:** The graduates of Information Science and Engineering Program should be able to establish an understanding of professionalism, teamwork, ethics, public policy that allows them to become good professional Engineers
- **PEO4:** The graduates of Information Science and Engineering Program should be able to provide novel engineering solutions and efficient software designs with legal and ethical responsibility.

**PEO5:** Continuously improve by pursuing advanced degrees in engineering, business, or other professional fields through formal means or through informal self-study.

## **PROGRAM OUTCOMES (POs):**

Graduates of the Information Science and Engineering Programme will be able to achieve the following POs:

## **PO1: Engineering Knowledge:**

Apply the knowledge of mathematics, science, engineering fundamentals, and **Information Science and Engineering** principles to the solution of complex problems in **Information Science and Engineering**.

### **PO2: Problem Analysis:**

Identify, formulate, research literature, and analyze complex **Information Science and Engineering** problems reaching substantiated conclusions using first principles of mathematics and engineering sciences.

### **PO3: Design/Development of Solutions:**

Design solutions for complex **Information Science and Engineering** problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations. **265** 

#### PO4: Conduct investigations of Complex problems:

Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions related to **Information Science and Engineering** problems.

## PO5: Modern Tool Usage:

Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex **Information Science and Engineering** activities with an understanding of the limitations.

## PO6: The Engineer and Society:

Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional **Information Science and Engineering** practice.

## PO7: Environment and Sustainability:

Understand the impact of the professional **Information Science and Engineering** solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

## PO8: Ethics:

Apply ethical principles and commit to professional ethics and responsibilities and norms of the **Information Science and Engineering** practice.

## PO9: Individual and Team work:

Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

## PO10: Communication:

Communicate effectively on complex **Information Science and Engineering** activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

## PO11: Project Management and Finance:

Demonstrate knowledge and understanding **266** engineering and management principles and apply these to one's own work, as a member and leader in a team, to

# manage **Information Science and Engineering** projects and in multidisciplinary environments.

### **PO12: Life Long Learning:**

Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

### **PROGRAM SPECIFIC OUTCOMES (PSOs):**

Program Specific Outcomes (PSOs) are what the graduates of a specific undergraduate engineering program should be able to do at the time of graduation.

#### **PSO1: Professional Skills:**

The ability to understand, analyze and develop algorithms and write Information application programs in the areas related to information technology

#### **PSO2: Problem-Solving Skills:**

Ability to understand the ethics, human values for solving societal problems and environmental protection

### **PSO3:** Foundation of mathematical concepts:

Ability to understand the software development skills and practical knowledge for promoting research, higher studies and entrepreneurship.

# **Outcome Based Education Curriculum**

2019-2020

Department of Mechanical Engineering

NAGARJUNA COLLEGE OF ENGINEERING & TECHNOLOGY

Mudugurki Village, VenkatagiriKote Post, Devanahalli taluk, Bangalore district - 562 164

#### An Autonomous College under VTU

#### DEPARTMENT OF MECHANICAL ENGINEERING

#### VISION

To train the students as professionals in Mechanical Engineering blended with leadership qualities to achieve excellence in the challenging future.

#### MISSION

- M1: Maintaining excellence in Mechanical Engineering education through academic professionalism and teaching for the changing needs of the society.
- M2: Establishing Centre of excellence for research to promote industrial exposure in the area of Mechanical Engineering.
- M3: Developing communication skill, leadership qualities, team work and skills for continuing education among the students
- M4: Inculcating ethics, human values and skills for solving societal problems and environmental protection
- **M5:** Creating opportunities to the students for experiencing real time problems through project works to enhance employability and entrepreneurship.

#### III to VIII Semesters

Outcome Based Education (OBE)/ Choice Based Credit System (CBCS) Curricula With effect from Academic Year 2019-20

#### **Program Educational Objectives (PEOs)**

PEO1	Graduates in Mechanical Engineering will apply the basic technical knowledge for design and analysis.
PEO2	Graduates in Mechanical Engineering will exhibit creative and innovative skills.
PEO3	Graduates in Mechanical Engineering will demonstrate good communication skills, dynamic leadership qualities with concern for environmental protection.
PEO4	Mechanical Engineering graduates will be capable of pursuing higher studies, take up research and development work blended with ethics and human values.
PEO5	Graduates in Mechanical Engineering will have the ability to become entrepreneurs thereby switching over from responsive engineering to creative engineering.

# Program Outcomes and Program SpecificOutcomes as defined by the Program

- Engineering Knowledge: Apply the knowledge of mathematics, science,engineering fundamentals, and Mechanical Engineering principles to the solution of complex problems in Mechanical Engineering.
- Problem Analysis: Identify, formulate, research interpretation, and analyzecomplex Mechanical Engineering problems reaching substantiated conclusions using first principles of mathematics and engineering sciences.

Design/Development of solutions: Design solutions for complex Mechani- cal Engineering problems and design system components or processes that meet
 PO3 the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental consider- ations.

PO4
 Conduct investigations of complex problems: Use research-based knowl- edge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions related to Mechanical Engineering problems.

**PO5** Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering tools such as CAD, CAM, CIM and FEM including prediction and modelling to complex Mechanical Engineering activities with an understanding of the limitations.

PO6 The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional Mechanical Engineering practice.

**PO7** Environment and Sustainability: Understand the impact of the professional Mechanical Engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

- **PO8** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the Mechanical engineering practice.
- **PO9** Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**Communication:** Communicate effectively on complex Mechanical engineering activities with the engineering community and with society at

**PO10** large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11 **Project management and Finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**Diffe-long learning:** Recognize the need for, and have the preparation and **PO12** ability to engage in independent and life- long learning in the broadest context of technological change.

#### **Program Specific Outcome (PSO):**

**PSO1.**Graduate will be able to identify, analyze& solve the problems related to Electronics and Communication Engineering by applying the fundamental knowledge of Electronics and Communication.

**PSO2.**Graduate will demonstrate an ability to investigate, design and develop both software and hardware using significant knowledge of modern tools in Electronics and Communication Engineering.

**PSO3.**Graduate will be able to apply their knowledge to assess societal, environmental, health, safety issues with professional ethics and can also pursue higher studies, involve in research activities, be employable or entrepreneur.

#### DEPARTMENT OF MECHANICAL ENGINEERING

#### VISION

To train the students as professionals in Mechanical Engineering blended with leadership qualities to achieve excellence in the challenging future.

#### MISSION

- M1: Maintaining excellence in Mechanical Engineering education through academic professionalism and teaching for the changing needs of the society.
- M2: Establishing Centre of excellence for research to promote industrial exposure in the area of Mechanical Engineering.
- M3: Developing communication skill, leadership qualities, team work and skills for continuing education among the students
- M4: Inculcating ethics, human values and skills for solving societal problems and environmental protection
- **M5:** Creating opportunities to the students for experiencing real time problems through project works to enhance employability and entrepreneurship.

## III to VIII Semesters

## Outcome Based Education (OBE)/ Choice Based Credit System (CBCS) Curricula With effect from Academic Year 2018-19

#### **Program Educational Objectives (PEOs)**

PEO1	Graduates in Mechanical Engineering will apply the basic technical knowledge for design and analysis.				
PEO2	Graduates in Mechanical Engineering will exhibit creative and innovative skills.				
PEO3	Graduates in Mechanical Engineering will demonstrate good communication skills, dynamic leadership qualities with concern for environmental protection.				
PEO4	Mechanical Engineering graduates will be capable of pursuing higher studies, take up research and development work blended with ethics and human values.				
PEO5	Graduates in Mechanical Engineering will have the ability to become entrepreneurs thereby switching over from responsive engineering to creative engineering.				

# Program Outcomes and Program SpecificOutcomes as defined by the Program

Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and Mechanical Engineering principles to the solution of complex problems in Mechanical Engineering.

Problem Analysis: Identify, formulate, research interpretation, and analyze
 complex Mechanical Engineering problems reaching substantiated conclusions using first principles of mathematics and engineering sciences.

**Design/Development of solutions:** Design solutions for complex Mechani- cal Engineering problems and design system components or processes that meet the approximate approximate approximate approximate for the public health and

**PO3** the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental consider- ations.

PO4
 Conduct investigations of complex problems: Use research-based knowl- edge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions related to Mechanical Engineering problems.

**Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering tools such as CAD, CAM, CIM and FEM including prediction and modelling to complex Mechanical Engineering activities with an understanding of the limitations.

PO6 The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional Mechanical Engineering practice.

**PO7** Environment and Sustainability: Understand the impact of the professional Mechanical Engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO8** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the Mechanical engineering practice.

**PO9** Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**Communication:** Communicate effectively on complex Mechanical engineering activities with the engineering community and with society at

**PO10** large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

Project management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

Life-long learning: Recognize the need for, and have the preparation andPO12 ability to engage in independent and life- long learning in the broadest context of technological change.

#### **Program Specific Outcome (PSO):**

**PSO1.**Graduate will be able to identify, analyze& solve the problems related to Electronics and Communication Engineering by applying the fundamental knowledge of Electronics and Communication.

PSO2.Graduate will demonstrate an ability to investigate, design and

develop both software and hardware using significant knowledge of modern tools in Electronics and Communication Engineering.

**PSO3.**Graduate will be able to apply their knowledge to assess societal, environmental, health, safety issues with professional ethics and can also pursue higher studies, involve in research activities, be employable or entrepreneur.

PEO3	Graduates in Mechanical Engineering will demonstrate good communication skills, dynamic leadership qualities with concern for environmental protection.				
PEO4	Mechanical Engineering graduates will be capable of pursuing higher studies, take up research and development work blended with ethics and human values.				
PEO5	Graduates in Mechanical Engineering will have the ability to become entrepreneurs thereby switching over from responsive engineering to creative engineering.				

# Program Outcomes and Program SpecificOutcomes as defined by the Program

Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and Mechanical Engineering principles to the solution of complex problems in Mechanical Engineering.

Problem Analysis: Identify, formulate, research interpretation, and analyze
 complex Mechanical Engineering problems reaching substantiated conclusions using first principles of mathematics and engineering sciences.

**Design/Development of solutions:** Design solutions for complex Mechani- cal Engineering problems and design system components or processes that meet

**PO3** the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental consider- ations.

PO4
 Conduct investigations of complex problems: Use research-based knowl- edge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions related to Mechanical Engineering problems.

**PO5** Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering tools such as CAD, CAM, CIM and FEM including prediction and modelling to complex Mechanical Engineering activities with an understanding of the limitations.

PO6 The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional Mechanical Engineering practice.

**PO7** Environment and Sustainability: Understand the impact of the professional Mechanical Engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

- **PO8** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the Mechanical engineering practice.
- **PO9** Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**Communication:** Communicate effectively on complex Mechanical engineering activities with the engineering community and with society at

**PO10** large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11 **Project management and Finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**Diffe-long learning:** Recognize the need for, and have the preparation and **PO12** ability to engage in independent and life- long learning in the broadest context of technological change.

#### **Program Specific Outcome (PSO):**

**PSO1.**Graduate will be able to identify, analyze& solve the problems related to Electronics and Communication Engineering by applying the fundamental knowledge of Electronics and Communication.

**PSO2.**Graduate will demonstrate an ability to investigate, design and develop both software and hardware using significant knowledge of modern tools in Electronics and Communication Engineering.

**PSO3.**Graduate will be able to apply their knowledge to assess societal, environmental, health, safety issues with professional ethics and can also pursue higher studies, involve in research activities, be employable or entrepreneur.

#### **Eighth Semester B.E. - Scheme**

#### An Autonomous College under VTU

#### DEPARTMENT OF MECHANICAL ENGINEERING

#### VISION

To train the students as professionals in Mechanical Engineering blended with leadership qualities to achieve excellence in the challenging future.

#### MISSION

- M1: Maintaining excellence in Mechanical Engineering education through academic professionalism and teaching for the changing needs of the society.
- M2: Establishing Centre of excellence for research to promote industrial exposure in the area of Mechanical Engineering.
- M3: Developing communication skill, leadership qualities, team work and skills for continuing education among the students
- M4: Inculcating ethics, human values and skills for solving societal problems and environmental protection
- **M5:** Creating opportunities to the students for experiencing real time problems through project works to enhance employability and entrepreneurship.

### III to VIII Semesters

Outcome Based Education (OBE)/ Choice Based Credit System (CBCS) Curricula With effect from Academic Year 2016-17

#### **Program Educational Objectives (PEOs)**

PEO1	Graduates in Mechanical Engineering will apply the basic technical knowledge for design and analysis.		
PEO2	Graduates in Mechanical Engineering will exhibit creative and innovative skills.		
PEO3	Graduates in Mechanical Engineering will demonstrate good communication skills, dynamic leadership qualities with concern for environmental protection.		
PEO4	Mechanical Engineering graduates will be capable of pursuing higher studies, take up research and development work blended with ethics and human values.		
PEO5	Graduates in Mechanical Engineering will have the ability to become entrepreneurs thereby switching over from responsive engineering to creative engineering.		

# Program Outcomes and Program SpecificOutcomes as defined by the Program

- Engineering Knowledge: Apply the knowledge of mathematics, science,engineering fundamentals, and Mechanical Engineering principles to the solution of complex problems in Mechanical Engineering.
- Problem Analysis: Identify, formulate, research interpretation, and analyzecomplex Mechanical Engineering problems reaching substantiated conclusions using first principles of mathematics and engineering sciences.

Design/Development of solutions: Design solutions for complex Mechani- cal Engineering problems and design system components or processes that meet
 PO3 the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental consider- ations.

PO4
 Conduct investigations of complex problems: Use research-based knowl- edge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions related to Mechanical Engineering problems.

**Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering tools such as CAD, CAM, CIM and FEM including prediction and modelling to complex Mechanical Engineering activities with an understanding of the limitations.

PO6 The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional Mechanical Engineering practice.

**PO7** Environment and Sustainability: Understand the impact of the professional Mechanical Engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO8** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the Mechanical engineering practice.

**PO9** Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**Communication:** Communicate effectively on complex Mechanical engineering activities with the engineering community and with society at

**PO10** large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

Project management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

Life-long learning: Recognize the need for, and have the preparation andPO12 ability to engage in independent and life- long learning in the broadest context of technological change.

#### **Program Specific Outcome (PSO):**

**PSO1.**Graduate will be able to identify, analyze& solve the problems related to Electronics and Communication Engineering by applying the fundamental knowledge of Electronics and Communication.

PEO5	Graduates in Mechanical Engineering will have the ability to become entrepreneurs thereby switching over from responsive engineering to creative engineering.

# Program Outcomes and Program SpecificOutcomes as defined by the Program

- Engineering Knowledge: Apply the knowledge of mathematics, science,engineering fundamentals, and Mechanical Engineering principles to the solution of complex problems in Mechanical Engineering.
- Problem Analysis: Identify, formulate, research interpretation, and analyzecomplex Mechanical Engineering problems reaching substantiated conclusions using first principles of mathematics and engineering sciences.

Design/Development of solutions: Design solutions for complex Mechani- cal Engineering problems and design system components or processes that meet
 PO3 the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental consider- ations.

PO4
 Conduct investigations of complex problems: Use research-based knowl- edge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions related to Mechanical Engineering problems.

**Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering tools such as CAD, CAM, CIM and FEM including prediction and modelling to complex Mechanical Engineering activities with an understanding of the limitations.

PO6 The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional Mechanical Engineering practice.

**PO7** Environment and Sustainability: Understand the impact of the professional Mechanical Engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO8** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the Mechanical engineering practice.

**PO9** Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**Communication:** Communicate effectively on complex Mechanical engineering activities with the engineering community and with society at

**PO10** large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

Project management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

Life-long learning: Recognize the need for, and have the preparation andPO12 ability to engage in independent and life- long learning in the broadest context of technological change.

#### **Program Specific Outcome (PSO):**

**PSO1.**Graduate will be able to identify, analyze& solve the problems related to Electronics and Communication Engineering by applying the fundamental knowledge of Electronics and Communication.

**PSO2.**Graduate will demonstrate an ability to investigate, design and develop both software and hardware using significant knowledge of

modern tools in Electronics and Communication Engineering.

**PSO3.**Graduate will be able to apply their knowledge to assess societal, environmental, health, safety issues with professional ethics and can also pursue higher studies, involve in research activities, be employable or entrepreneur.

# DEPARTMENT OF CIVILENGINEERING

### VISION

To transform the students as leaders in CivilEngineering to achieve professional excellence in the challenging future.

### MISSION

M1: To provide the Civil Engineering knowledge and skills for students through an excellent academic environment.

M2: Adopting innovative teaching techniques using modern engineering tools for designing, modeling and analyzing the societal and environmental problems.

M3: Developing Communication skill, leadership qualities through teamwork and skills for continuing education among the students.

M4: To inculcate moral, ethical and professional values among students to serve the society.

M5: Validate engineering knowledge through innovative research projects to enhance their employability and entrepreneurship skills.

HOD Civil Engineering Nagarjuna College of Engineering

Nacariuna Collec Devanahalli (To) Bengaluru (Dt.)-Pin: 562164

Mudegerid Village, Venkatagirikolo-Post Davinskuti Jaluk Rongaluru -602-164

### Program Educational Objectives (PEOs)

PEO1: Graduates in Civil Engineering will apply the technical knowledge for sustainable societal growth.

PEO2: Graduates of civil Engineering will demonstrate designing, modeling and analyzing skills.

PEO3: Graduates in Civil Engineering will demonstrate good communication skills, dynamic leadership qualities with concern for environmental protection.

PEO4: Civil Engineering graduates will be capable of pursuing higher studies, take up research and development work blended with ethics and human values.

PEOS: Civil engineering graduates will have the ability to become entrepreneurs thereby switching over from responsive engineering to creative engineering.

### Program Outcomes (POs)

PO-1: Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals and Civil Engineering principles to the solution of complex problems in Civil Engineering.

PO-2: Problem Analysis: Identify, formulate, research literature and analyze complex Civil Engineering problems reaching substantiated conclusions using first principles of mathematics and engineering sciences.

**PO-3:** Design/Development ofSolutions: Design solutions for complex Civil Engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, cultural, societal and environmental considerations.

PO-4: Conduct Investigations of Complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions related to Civil Engineering problems.

PO-5: Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering tools such as CAD, FEM, GIS, etc. including prediction and modeling to complex Civil Engineering activities with an understanding of the limitations.

PO-6: The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professionalCivil Engineering practice,

PO-7: Environment and Sustainability: Understand the impact of the professional Civil Engineering solutions in societal and environmental contexts and demonstrate the knowledge and the need forsustainable development.

PO-8: Ethics: Apply ethical principles and commit to professional ethics and responsibilities while following the Civil Engineering practice.

PO-9: Individual and Team work: Function effectively as an individual and as a member or leader in diverse teams and in multidisciplinary settings.

PO-10: Communication: Communicate effectively on complex Civil Engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO-11**: Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in ateam, to manage Civil Engineering projects and in multidisciplinary environments.

PO-12: Life Long Learning: Recognize theneed for, and have the preparation and ability to engage in independent and life-longlearning in the broadest context of technological change.

### Program Specific Outcome (PSO)

PSO-1: Apply the knowledge of Civil Engineering in Sustainable Infrastructure developments.

PSO-2: Identify, analyze and manage Civil Engineering problems with ethical and social responsibilities.

PSO-3: Implementation of relevant codes/ specifications/ guidelines to arrive at comprehensive solutions to address societal needs and exhibit communication and teamwork skills.

# DEPARTMENT OF CIVILENGINEERING

#### VISION

To transform the students as leaders in CivilEngineering to achieve professional excellence in the challenging future.

#### MISSION

M1: To provide the Civil Engineering knowledge and skills for students through an excellent academic environment.

M2: Adopting innovative teaching techniques using modern engineering tools for designing, modeling and analyzing the societal and environmental problems.

M3: Developing Communication skill, leadership qualities through teamwork and skills for continuing education among the students.

M4: To inculcate moral, ethical and professional values among students to serve the society. M5: Validate engineering knowledge through innovative research projects to enhance their employability and entrepreneurship skills.

Conversioned Target Stor grade to -552 134

Nagarjuna College of Engineering & Technology Devanahalli (Tq) Bengaluru (Dt.)-Pin: 562164

# Program Educational Objectives (PEOs)

18: 19:00

PEO1: Graduates in Civil Engineering will apply the technical knowledge for sustainable societal growth.

PEO2: Graduates of civil Engineering will demonstrate designing, modeling and analyzing skills.

PEO3: Graduates in Civil Engineering will demonstrate good communication skills, dynamic leadership qualities with concern forenvironmental protection.

PEO4: Civil Engineering graduates will be capable of pursuing higher studies, take up research and development work blended with ethics and human values.

PEO5: Civil engineering graduates will have the ability to become entrepreneurs thereby switching over from responsive engineering to creative engineering.

#### Program Outcomes (POs)

PO-1: Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals and Civil Engineering principles to the solution of complex problems in Civil Engineering.

PO-2: Problem Analysis: Identify, formulate, research literature and analyze complex Civil Engineering problems reaching substantiated conclusions using first principles of mathematics and engineering sciences.

PO-3: Design/Development of Solutions: Design solutions for complex Civil Engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, cultural, societal and environmental considerations.

PO-4: Conduct Investigations of Complexproblems: Use research-based knowledgeand research methods including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions related to Civil Engineering problems.

PO-5: Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering tools such as CAD, FEM, GIS, etc. including prediction and modeling to complex Civi Engineering activities with an understanding of the limitations.

PO-6: The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal health, safety, legal and cultural issues and the consequent responsibilities relevant to the professiona Civil Engineering practice.

PO-7: Environment and Sustainability: Understand the impact of the professional Civil Engineering solutions in societal and environmental contexts and demonstrate the knowledge and the need for sustainable development.

PO-8: Ethics: Apply ethical principles and commit to professional ethics and responsibilities while following the Civil Engineering practice.

. PO-9: Individual and Team work: Function effectively as an individual and as a member or leader in diverse teams and in multidisciplinary settings.

PO-10: Communication: Communicate effectively on complex Civil Engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO-11: Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these toone's own work, as a member and leader in a team, to manage Civil Engineering projects and in multidisciplinary environments.

PO-12: Life Long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-longlearning in the broadest context of technological change.

#### Program Specific Outcome (PSO)

Ph. In Sec.

PSO-1: Apply the knowledge of Civil Engineering in Sustainable Infrastructure developments.

PSO-2: Identify, analyze and manage Civil Engineering problems with ethical and social responsibilities.

PSO-3: Implementation of relevant codes/ specifications/ guidelines to arrive at comprehensive solution: to address societal needs and exhibit communication and teamwork skills.

#### DEPARTMENT OF CIVILENGINEERING

#### VISION

To transform the students as leaders in CivilEngineering to achieve professional excellence in the challenging future.

#### MISSION

M1: To provide the Civil Engineering knowledge and skills for students through an excellent academic environment.

M2: Adopting innovative teaching techniques using modern engineering tools for designing, modeling and analyzing the societal and environmental problems.

M3: Developing Communication skill, leadership qualities through teamwork and skills for continuing education among the students.

M4: To inculcate moral, ethical and professional values among students to serve the society.

M5: Validate engineering knowledge through innovative research projects to enhance their employability and entrepreneurship skills.

HOD Civil Engineering Nagarjuna College of Engineering & Technology Muduguril Village, Variestigirikote Pont Devananceit Talux, Bengeluru -562 164

### Program Educational Objectives (PEOs)

PEO1: Graduates in Civil Engineering will apply the technical knowledge for sustainable societal growth.

PEO2: Graduates of civil Engineering will demonstrate designing, modeling and analyzing skills.

PEO3: Graduates in Civil Engineering will demonstrate good communication skills, dynamic leadership qualities with concern forenvironmental protection.

PEO4: Civil Engineering graduates will becapable of pursuing higher studies, take up research and development work blended with ethics and human values.

PEO5: Civil engineering graduates will have the ability to become entrepreneurs thereby switching over from responsive engineering to creative engineering.

#### Program Outcomes (POs)

PO-1: Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals and Civil Engineering principles to the solution of complex problems in Civil Engineering.

PO-2: Problem Analysis: Identify, formulate, research literature and analyze complex Civil Engineering problems reaching substantiated conclusions using first principles of mathematics and engineering sciences.

PO-3: Design/Development of Solutions: Design solutions for complex Civil Engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, cultural, societal and environmental considerations.

PO-4: Conduct Investigations of Complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions related to Civil Engineering problems.

PO-5: Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering tools such as CAD, FEM, GIS, etc. including prediction and modeling to complex Civil Engineering activities with an understanding of the limitations.

PO-6: The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professionalCivil Engineering practice.

PO-7: Environment and Sustainability: Understand the impact of the professional Civil Engineering solutions in societal and environmental contexts and demonstrate the language and the need forsustainable development.

PRANUL

PO-8: Ethics: Apply ethical principles and commit to professional ethics and reponsibilities while following the Civil Engineering practice.

PO-9: Individual and Team work: Function effectively as an individual and as a member or leader in diverse teams and in multidisciplinary settings.

PO-10: Communication: Communicate effectively on complex Civil Engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO-11**: Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these toone's own work, as a member and leader in ateam, to manage Civil Engineering projects and in multidisciplinary environments.

PO-12: Life Long Learning: Recognize theneed for, and have the preparation and ability to engage in independent and life-longlearning in the broadest context of technological change.

#### Program Specific Outcome (PSO)

PSO-1: Apply the knowledge of Civil Engineering in Sustainable Infrastructure developments.

PSO-2: Identify, analyze and manage Civil Engineering problems with ethical and social responsibilities.

PSO-3: Implementation of relevant codes/ specifications/ guidelines to arrive at comprehensive solutions to address societal needs and exhibit communication and teamwork skills.
